The Rescue Systems I and Rescue Systems II classes are specialized training, very specific in nature and offered by a limited number of local resources. Instructors as well as training sites for Rescue Systems I and II must be State of California Fire Marshall authorized and approved to obtain the State Certifications of completion. Going beyond the local area for this training would adversely affect the cost of providing the training and incur additional expenses such as travel, lodging and per diem.

PRICE REASONABLENESS: The pricing per student and total class pricing is comparable with the same classes offered elsewhere in the State of California at State Fire Marshall approved sites. The vendor listed has given Riverside County Fire price reductions in the form of "No Charge" for use of approved sites.

The end result will be a benefit to the County of Riverside by increasing the number of Public Safety Personnel trained in these specialized techniques for disaster emergency rescues.

Fire will be working with Purchasing and Fleet Services to establish a contract for services to provide future training classes.
