Page 2 of 2

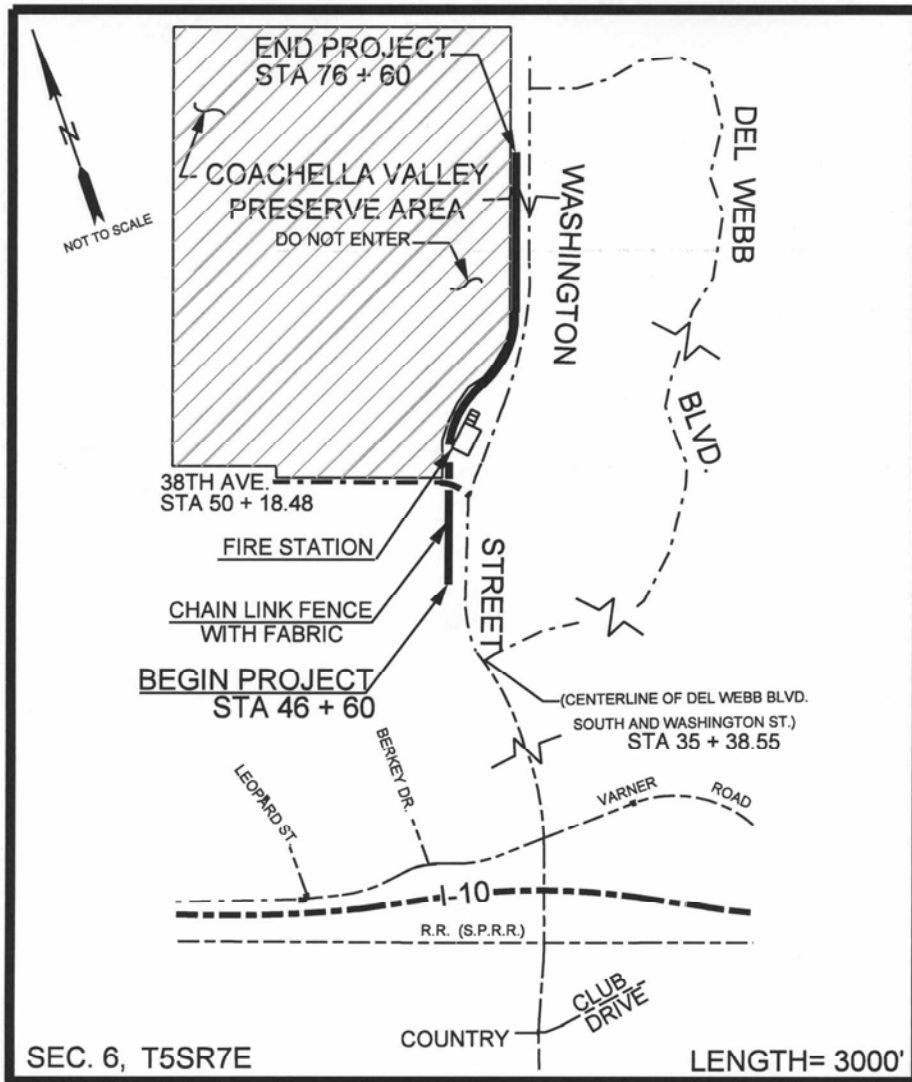

The Transportation Department has received a COLMAC grant in the amount of \$75,000 for the work. In order to keep the project costs as close to the grant amount as possible, the Transportation Department recommends that the bids received be rejected, and that the project be advertised for new bids under the revised scope of work that has been developed by the Department. The revised scope of work, which no longer includes the installation of k-railing, is expected to result in a substantially lower total project cost.

The revised bid documents require the bidding contractors to submit bids for the base items of work, and for three alternate bid schedules. This will allow the best combination of improvements to be selected for award within the amount of available COLMAC funds. The desired work will consist of chain link fencing with fabric, and bird repellent hardware, to prevent raptors from using the fencing for hunting of the endangered fringe-toed lizard. The bird-repellent hardware is a requirement of the State of California Department of Fish and Game.

The submitted plans and specifications have been approved as to form by County Counsel. Environmental clearance is complete.
