HEMET MDP LINE D STAGE 6 PROJECT NO. 4-0-0211

This project will construct approximately 1,600 feet of underground reinforced concrete pipe storm drain, ranging in size from 72 inches to 24 inches in diameter. This storm drain will be constructed within street right of way in front of Hemet High School along Stetson Avenue between Dartmouth and Stanford Streets, and will construct Lateral Line D-4 on Stanford Street. This stage of the project is being constructed out of sequence with stages 4 and 5 to allow installation of the storm drain before the construction of street improvements that will be done by Hemet Unified School District, thus avoiding the need to trench through the newly improved street. No inlets to this storm drain will be constructed until the downstream stages 4 and 5 of Hemet MDP Line D are constructed.
