BACKGROUND:

The primary goal of the Bioassessment Study is to develop a regionally consistent and integrated freshwater bioassessment monitoring program for Southern California. Study products will include development of regional Standard Operating Procedures for field, laboratory and information management activities, evaluation and modification of the existing California Department of Fish and Game Index of Biological Integrity that was originally developed for San Diego County, and development of a regional monitoring program.

The District's contribution to this study will be \$25,000 for FY 2004-05.
