The new interchange is a critical element in the development and economic success of the area. It is designed to alleviate congestion to existing interchanges and is intended to separate commercial/industrial truck traffic from commuter corridors and residential areas.

The anticipated annual cost to the County for traffic signal and lighting operation and maintenance is estimated at \$11,000, which will be funded from gas tax.

The submitted plans and specifications have been approved as to form by County Counsel. Environmental clearance is complete.
