COMPREHENSIVE COLLECTION

Many of the unincorporated portions of Riverside County are plagued with illegal dumping along County roads and upon private property. Within the waste collection franchises executed in the last several years, most included provisions for the removal of roadside waste as a means of addressing some of the effects of such illegal disposal. The lack of comprehensive collection is frequently noted as a contributing factor to this ongoing problem. The establishment of comprehensive collection in this area would also reduce certain portions of the regular rate for service. During the franchising process there was frequent discussion at the Board regarding the desirability of establishing mandatory collection areas in numerous areas throughout the County.

Resolution 2006-063 submitted as Exhibit A would establish Comprehensive (mandatory) collection for all residential units within certain portions of the Fifth District as per the conditions established in Ordinance 745 and under the terms of the Waste Franchise Agreement.

The Franchisee will notify each household by mail of this new requirement, using forms approved by the Department of Environmental Health.

FINANCIAL

There will be no net costs to the County from the provision of these services. The County may realize a minimal increase in franchise fees paid by the Franchisee due to a slightly increased customer base.
