

**SUBMITTAL TO THE BOARD OF SUPERVISORS
COUNTY OF RIVERSIDE, STATE OF CALIFORNIA**

541

FROM: TLMA – Transportation Department

SUBMITTAL DATE:

April 17, 2006

SUBJECT: Special Maintenance Projects for Fiscal Year 2006/2007

RECOMMENDED MOTION: : That the Board authorize the Transportation Department to begin work in April 2006 on the 2006/2007 fiscal year Special Maintenance Projects.

BACKGROUND: The activities to be performed for the Special Maintenance Projects include applying a seal coat to the pavement. A seal coat is an application of asphaltic emulsion which may be immediately covered by a layer of rock chips (chip seal) or a sand/emulsion mixture (slurry seal). These applications cannot be made when the pavement temperature is below 80 degrees Fahrenheit. The months of May through October provide the most optimum weather conditions for this maintenance. This program is consistent with the Board policy established at the workshop in June 1996. Slurry seal is being used on local residential streets with curb and gutter whenever possible to minimize complaints of loose rock chips.

The Special Maintenance Projects identified in the attached document will be included in the 2006/2007 annual edition of the Transportation Improvement Program. Preparation activities on these projects should begin now to allow the work to be done during favorable weather conditions.

Juan C. Perez
Deputy Director of Transportation

RKN:

George A. Johnson
Director of Transportation
