Subject: Ratify Agreement No. 06-55191 with the California Department of Health Service

BACKGROUND: (Continued).

The Immunization Project was established to ensure adequate immunization of Riverside County children against vaccine-preventable childhood diseases. The goal of this program is to raise and maintain immunization rates of 90% or better for our children by age 2 years and 95% or better for our school-aged children kindergarten through grade 12.

The national recommendations are age-appropriate immunizations for polio, diphtheria, tetanus, pertussis, measles, mumps, rubella, hepatitis B, hepatitis A, chickenpox, Hemophilus influenza type B, and invasive pneumococcal disease. An allotment of \$170,000 was awarded for collaborative activities targeting WIC clients. As part of the collaborative activities parent education classes are given to stress the importance of timely immunizations for their children. This is a State mandated program.

The \$556,401 funding has been included in the Fiscal Year 2006/2007 budget; Award 06-55191 increases this amount by \$15,750.
