

**SUBMITTAL TO THE BOARD OF SUPERVISORS
COUNTY OF RIVERSIDE, STATE OF CALIFORNIA**

130

FROM: Waste Management Department

SUBMITTAL DATE:
June 8, 2007

SUBJECT: Approval to Advertise for the 2007 Phase 3 Landfill Gas Collection System Construction at the Badlands Landfill

RECOMMENDED MOTION: That the Board of Supervisors approve the Contract Documents for the 2007 Phase 3 Landfill Gas Collection System Construction at the Badlands Landfill; and authorize the Waste Management Department (Department) to advertise for bids.

BACKGROUND: As part of the Department's ongoing compliance with air quality regulations and efficient operation of the gas to energy facility at the Badlands Landfill, five horizontal landfill gas (LFG) extraction wells (4,000 linear feet) and five vertical LFG extraction wells (520 linear feet) need to be installed. Additional header and lateral piping to collect the LFG and associated LFG condensate is also needed as part of this project. The current gas collection system has twelve horizontal collection wells and thirty-nine vertical collection wells in operation. As the landfill site expands vertically and horizontally, the additional LFG collection wells are necessary.

The Engineer's estimate for the project is \$267,050.
