The Transportation Improvement Program also provides for the modification of the traffic signal at the intersection of Central Avenue and Palomar Street in order to provide for left turn lanes and protected turn movements on Central Avenue. The intersection is adjacent to an elementary school, and the improvements are needed to reduce delays at the intersection and provide for better control of traffic movements for improved intersection safety. The intersection meets the criteria for the installation of protected turn phasing.

The County's 2/3 share of the annual traffic signal operation and maintenance costs for the intersection of Clinton Keith Road and Grand Avenue is estimated at \$4,000, to be funded from gas tax. The cooperative agreement between the County of Riverside and the City of Murrieta, for the traffic signal at Clinton Keith Road and Grand Avenue, is expected to be submitted to the Board for execution prior to the award of the construction contract.
