RE: Slurry Seal and Cape Seal Projects at Various Locations FY 2009.

May 5, 2008

Page 2 of 2

The Department is seeking authorization to advertize the Slurry Seal projects prior to the approval of the 2009 Transportation Improvement Program. It is anticipated the 2009 Transportation Improvement Program will be approved before the request for award of the project is presented to the Board.

Placement of slurry seal is a temperature sensitive application. The Transportation Department is initiating the advertisement of the project early in order to have a contractor in place to begin work in the summer months.

Slurry seal treatments consist of an application of a liquid asphalt and sand mixture.

Cape seal treatments consist of an application of liquid asphalt covered by rock chips and then later covered by a light slurry seal.

Rubberized slurry seal treatments consist of an application of liquid asphalt also containing recycled tire rubber.

The submitted plans and specifications have been approved as to form by County Counsel.
