The traffic safety improvements include flashing beacons, radar feedback signs, road signs, striping, road markings, pavement markers and street name signs with larger letters.

Two flashing beacons will warn traffic, along Washington Street, of cross traffic at intersections of limited sight distance. Also, two solar powered radar feedback signs will be installed on Washington Street. The radar signs will display traffic speed to make drivers aware of their speed.

The submitted plans and specifications have been approved as to form by County Counsel. Environmental clearance is complete.
