intersection of McCall Boulevard and Sherman Road just south of the new school site. Both County and MUSD recognize that additional traffic will be using the currently unsignalized intersection of McCall Boulevard and Sherman Road, especially before and after school. McCall Boulevard is a 4-lane, divided highway with a posted speed limit of 45 mph. The construction of a traffic signal at the intersection of McCall Boulevard and Sherman Road will facilitate access to the new school and improve traffic safety and operation at the intersection.

The total cost for the project was estimated at \$350,000 with the County and the District sharing the cost at 50% each as indicated in Exhibit A of the proposed cooperative agreement. The County's share amounts to \$175,000 and is to be funded by Western County Traffic Signal DIF.

This project will be added to the department's signal list to be included with the *Transportation Improvement Program (TIP)* document, which is anticipated to be going to the Board before the end of the calendar year.

The District would be the lead agency for the construction of the improvements and upon completion of such improvements; the County will reimburse the District for the County's share of the cost.

The agreement has been executed by the Menifee Union School District.

It is recommended that the Board approve the agreement.

County Counsel has approved the agreement as to form.
