The Honorable Board of Supervisors

RE: Approve the sole source purchase of Bentley Systems, Incorporated (Bentley) "InRoads" software and associated "SelectService" (support/maintenance) contract for delivery of Capital Improvement projects.

April 22, 2009

Page 2 of 2

nineteen software licenses of Bentley "InRoads" and associated "SelectService" (support/maintenance) contracts for improved efficiency in delivery of Capital Improvement projects. The current design software has had significant compatibility problems with our C.A.D. software leading to lost productivity and increased staff costs to provide design plans.

The Transportation Department has been using Bentley "MicroStation" as the main Computer Aided Drafting (C.A.D.) software platform for more than twenty years, and more recently began using Bentley "I-Plot" as the main plot server software. The Transportation Department desires to incorporate an additional Bentley software program called InRoads. InRoads is a computer aided engineering and design program that integrates with Bentley's MicroStation C.A.D. software.

MicroStation, I-Plot and InRoads software are all developed and sold exclusively by Bentley and consequently Bentley is the Sole Source for acquiring the software. These Bentley products are the preferred software used by transportation consultants and other agencies that the Transportation Department does business with, including Caltrans. The Transportation Department is required to provide Caltrans with electronic files in formats compatible with Caltrans standards and systems. Using InRoads will make it more efficient to comply with these requirements.

This purchase does not obligate the Transportation Department to future or similar contractual obligations. There is an annual maintenance cost of \$14,484.06 which is less than we pay for annual maintenance of our current system.

PRICE REASONABLENESS: The pricing for this request is a negotiated item. The Transportation Department has funds programmed into the budget for fiscal year 2008-2009 for this procurement. The pricing is consistent with other current comparable software packages. The Department has negotiated pricing which is below that offered for typical State and Local Government accounts with the General Services Administration (US Federal GSA) and the State of California, Multiple Awards Schedule (CMAS) program.
