BACKGROUND: (Continued)

On June 3, 2008 the Board of Supervisors ratified the contract between Knight Maintenance, DBA Air Metrix and the County of Riverside. The contract was included in the total project budget of \$2,322,566 for the construction of the security camera system and remodel of the control room at the Riverside Juvenile Hall.

This project provided new security cameras, security fence system, and remodel of existing control room and construction of a server room to house the required equipment for the entire system throughout the exterior and interior portions of the campus. A detailed design was completed to meet the required placement of cameras and conduit, fence security system, remodel of control room and construction of the new server room. The new fence security system, cameras and electrical infrastructure were constructed to secure the entire exterior and interior areas of the buildings and campus including the large exercise field and fence lines to maximize security/trespass onto adjacent residential properties. These areas were previously unsecure and therefore a significant security problem.

The project was inspected and found to comply with all contract requirements. This Board action will release the retention funds of \$165,646 to Knight Maintenance, DBA Air Metrix. County Counsel has approved the Notice of completion as to legal form.
