12.1

In April of 2010, the Waste Management Department issued a Request for Proposal (RFQ/P) for O&M of the existing G2E facility. Two proposals were received in May of 2010. The Waste Management Department reviewed and evaluated each proposal. It was determined that SCS Energy provided the best overall proposal. The table below shows the economic evaluation of the two proposals received.

| | SCS Energy | Power Management Inc. |
|------------------------------|-------------------|------------------------------|
| 3 year power sales | \$1,915,903 | \$1,914,397 |
| 3 year O & M cost | \$1,485,618 | \$1,492,170 |
| 3 year SCE Connection Charge | \$54,000 | \$54,000 |
| 3 year revenue | \$376,285 | \$368,227 |

Thirty-eight million kilo-watts of renewable power have been generated since start-up of the facility. The power is currently sold to the Southern California Edison (SCE) as part of their "green power" portfolio under an existing 10-year power sales agreement, which is set to expire on March 31, 2019.

Energy production associated with landfill gas is not as predictable as it is with cleaner and more reliable pipeline gas. Many variables exist within the landfill environment that may interrupt supply and quality (such as damage to extraction wells related to trash settlement, vehicular damage, weather conditions, etc.), in addition to the unforeseen wear and tear on the engine beyond normally scheduled maintenance that is called out in the current agreement. It is for that reason that staff is recommending the General Manager-Chief Engineer be allowed to approve payments for damages unrelated to SCS Energy's fault at an amount not to exceed 10 percent of the original contract amount.

Staff recommends approval of the Amendment and granting of the payment authority to the General Manager-Chief Engineer.

The Contractor shall provide with the invoice full written documentation of its computation of the Monthly Contractor Payment.

8.2.c. Review of Invoices and Disputes

If the County disputes the amount of such invoice, it shall give the Contractor Notice of such dispute within fifteen (15) days of receipt of invoice, together with any request for additional information, identified with reasonable specificity, with respect thereto. Within fifteen (15) days of receiving the County's Notice, the Contractor shall respond to the County's dispute and supply any such information. If the Contractor does not respond within such time, its concurrence with the County's dispute will be deemed to exist. If County disagrees with Contractor's response and Contractor and County cannot reach

agreement during an ensuing fifteen (15) Working Day period following the County's response, the Contractor shall submit a claim to the County pursuant to Section 16 of the Professional Service Agreement.

8.2.d. Payment

If Contractor submits invoices on or before the fifteenth (15th) day of any month, the County shall attempt to pay, in full to the Contractor all undisputed amounts by the fifteenth (15th) day of the next succeeding month. If the Contractor submits any invoice after the fifteenth (15th) day of any month, the County shall attempt to pay all undisputed amounts within thirty (30) days of receipt of the Contractor's invoice.

8.2.e. Offsets

The County may offset against the Monthly Contractor Payment any amounts owed by the Contractor to the County for penalties from the CAISO or scheduler or loss of power sales income as described under this Agreement.

8.3. Other Allowed Adjustments

8.3.a. Limitation

Except as otherwise provided below, adjustments to compensation shall be based only on the provisions governing Amendments contained in ARTICLE 11. The following exceptions will apply:

8.3.a.i) Cost Reducing Change

A change resulting in an equal share in cost-savings between the Parties.

8.3.a.ii) Change in Law

The County will equitably adjust the compensation to the Contractor for changes in Direct Costs or financing costs demonstrated to be directly the result of a Change in Law, except for changes in Tax Law, occurring after the Contractor's signature date for this Agreement. Any request for an adjustment in compensation due to a Change in Law will be considered by the County. The Parties recognize that a Change in Law also may result in a decrease in Direct Costs or in financing costs, and that the County may order a reduction in Contractor compensation.

ARTICLE 9. BONDS, FURTHER ASSURANCES

9.1. Bonds and Surety Instrument

All bonds shall be executed by a corporation admitted to issue surety bonds or insurance in the State, subject to regulation by the California Insurance Commissioner, rated not less than "(A-7)" by A.M. Best Company, Inc. as applicable, and having a financial condition and record of service reasonably satisfactory to the County. The Contractor shall carry, and keep in force:

9.1.a. Operations Performance Bond and Surety Instruments

The contractor shall submit a five-hundred thousand dollar (\$500,000) surety bond as a security for the faithful performance of the contract for the full three year duration of the contract, including but limited to, costs, loss or damage to the County resulting from the breach or default of Contractor under any provision whatsoever of this agreement. The bond must be submitted on forms provided by the County. Bonds submitted in any other form will not be accepted.

9.2. Destruction of Premises

If the Facility is totally or partially destroyed from a risk covered by insurance which the Contractor must maintain pursuant to the Agreement, the Contractor shall restore the Facilities to substantially the same condition as it was in immediately before destruction. If the Facilities is totally destroyed or materially damaged by a peril which the Contractor is obligated to insure against pursuant to this Agreement but has failed to do so, County shall have the option to terminate this Agreement in accordance with Section 8 of the Professional Service Agreement or to restore the Facilities at the Contractor's expense, such option to be exercised within three months after destruction or damage occurs.

ARTICLE 10. SHORTFALLS, BREACHES AND DEFAULTS

10.1. Contractor Breaches

In the event that the Contractor fails to perform fully any of the Contractor's Obligations including failure to achieve the Facilities Operation Guaranty, in accordance with the terms hereof, it shall be in breach of this Agreement. Upon delivery of Notice thereof to the Contractor, the County may exercise any one or more of the following remedies to which it may be entitled, according to proof:

10.1.a. Damages

Any applicable damages including but not limited to the County's incremental cost, if any, of destruction of landfill gas through means other than the landfill gas to energy plant.

10.1.b. Specific Performance

Contractor acknowledges that the County's remedy of damages of a breach hereof by the Contractor may be inadequate for reasons including:

- The control of landfill gas at the Site which constitutes a threat to public health;
- The long term and significant investment of money and personnel (both County staff and private consultants, including engineers, financial advisors, procurement counsel, bond counsel and investment bankers) required to request and evaluate quotes for alternative service comparable to the service provided hereunder for the price provided hereunder, and to negotiate new agreements therefore;
- The County's reliance on the Contractor's technical expertise; and,
- The County's obligation to repay municipal bonds or any other borrowed funds, if used to finance part or all of the Facilities regardless, of whether it secures Contractor's performance hereunder.

Consequently, County shall be entitled to all available equitable remedies, including specific performance and injunctive relief.

10.1.c. Substitute Services

The Contractor shall promptly secure and pay for substitute services for the County substantially similar to the services it is obligated to provided hereunder, upon the same terms and conditions as provided hereunder, including all Contractor Performance Obligations, and the Facilities Operations Guaranty, satisfactory to the County.

10.2. Events of Default

10.2.a. Contractor Default

Each of the following shall constitute an event of default by the Contractor:

10.2.a.i) Uncured Breach of Agreement

The Contractor fails to cure any breach,

1. within five (5) working days of receiving Notice from the County specifying the breach; provided that if the nature of the breach is such that it will reasonably require more than five (5) working days to cure, the Contractor shall not be in default so long as the Contractor promptly commences to cure such breach and diligently proceeds to complete same; or
2. immediately, if the breach is such that the health, welfare or safety of the public is endangered thereby.

10.2.a.ii) Bankruptcy, Insolvency, Liquidation

The Contractor files a voluntary claim for debt relief under any applicable bankruptcy, insolvency, debtor relief or other similar law now or hereafter in effect, or consents to the appointment of or taking of possession by a receiver, liquidator, assignee, trustee, custodian, administrator or similar official of the Contractor for any part of operating assets or any substantial part of the Contractor's property, or makes any general assignment for the benefit of the Contractor's creditors.

A court having jurisdiction enters a decree or order for relief in respect of the Agreement in any involuntary case brought under any bankruptcy, insolvency, debt relief or similar law, now or hereinafter in effect, or the Contractor consents to or fails to oppose any such proceeding, or any such court enters a decree or order appointing a receiver, liquidator, assignee, custodian, trustee, sequestrator (or similar official) of the Contractor for any part of the Contractor's operating equipment or assets, or orders the winding up or liquidation of the Contractor.

10.2.b. Remedies in the Event of Contractor Default

Upon the occurrence of a Contractor Default, the County shall have the following rights:

10.2.b.i) Termination

Terminate the Agreement in accordance with Section 8.2 of Professional Service Agreement; and

10.2.b.ii) All Other Available Remedies

To exercise all of its remedies in accordance with this Article and any other remedies at law and in equity, to which the County shall be entitled, according to proof.

Limitation. In the event the County does not exercise its right to terminate, the County shall have the right to:

- (i) seek performance by the surety under any performance bond,
- (ii) make a claim on any insurance policy or policies, and/or
- (iii) draw any retainage, letter of credit, or other instrument furnished by Contractor.

10.3. Waiver

A waiver by the County of any breach or default by the Contractor shall not be deemed to be waiver of any other breach or default by the Contractor, including ones with respect to the same obligations hereunder. The subsequent acceptance by the County of any damages or other money paid by the Contractor hereunder shall not be deemed to be a waiver by the County of any pre-existing or concurrent breach, or Default by the Contractor.

10.4. Facilities Operation Guaranty Damages

The following are damages associated with Contractor failure to meet any of the components of the Facilities Operation Guaranty:

1. Loss of electrical sales income
2. Regulatory fines and penalties
3. Loss of environmental control of landfill gas potentially creating health and safety hazards

Contractor shall not be liable for any damages for loss of electrical sales income set forth above in condition (1) listed above, that arise in the first 2,190 hours that the Facility is off-line or under produces 2,190 MWH due to Contractor's fault in any contract year. Damages payable for loss of electrical sales income set forth above in condition (1) shall only accrue on those damages that arise after the Facility have been off-line due to Contractor's fault after 2,190 hours or 2,190 MWH in any contract year. Time taken to conduct scheduled overhauls, as listed as Exhibit B, will not be counted as off-line. Damages for electrical sales income set forth above in condition (1) shall be calculated by subtracting the Routine Operation fee kWh from the County's per kWh power sales rate. Any damage amount determined from the loss of power sales income shall be subtracted from the monthly Routine Maintenance Fee.

Resolution of any dispute regarding this Section shall be governed by the provisions set forth in the Professional Service Agreement.

10.5. Criminal Activity of Contractor

Should the Contractor or any of its officers or directors be "found guilty" of felonious conduct relating to the Contractor's Obligations, or other felonious conduct at any of the Contractor's operations involving (i) a price fixing or (ii) bribery of public officials, the County reserves the right:

1. to unilaterally terminate this Agreement in accordance with Section 8 of Professional Service Agreement; or
2. exercise all other remedies available to County as if a Contractor Default had occurred, in accordance with ARTICLE 10.2; or
3. to impose sanctions which may include financial sanctions or any other condition deemed appropriate short of termination.

Such action shall be taken after the Contractor has been given notice and an opportunity to present evidence in mitigation.

The term "found guilty" shall be deemed to include any judicial determination that Contractor or any of Contractor's officers, directors or employees is guilty, and any admission of guilt by Contractor, or any of Contractor's officers, directors or employees including, but not limited to, the pleas of "guilty", "nolo contendere", "no contest" or "guilty to a lesser felony" entered as part of any plea bargain.

If the County does not terminate this Agreement, the Contractor shall dismiss or remove such officers, directors or employees and take all action necessary and appropriate to remedy any breach of Contractor's Obligations.

10.6. Uncontrollable Circumstances

10.6.a. "Uncontrollable Circumstance(s)"

"Uncontrollable Circumstance(s)" means any act, event or condition outside either Party's control that is not the result of willful or negligent action or inaction on the part of such Party, which materially and adversely affects the ability of either Party to perform any of its obligations hereunder, including:

1. any Labor Action, other than a Labor Action by the employees of the Contractor or the County.
2. the failure of any appropriate federal, State, County, or local public agency or private utility having operational jurisdiction in the area in which the Facilities is located, to provide and maintain utilities, services, water, sewer or power transmission lines to the Facilities which are required for Facilities Operation;
3. a Change in Law other than Changes in Law excluded in item (2) below;
4. the suspension or interruption of Facilities Operations as a result of any release, spill, contamination, migration or presence of any Hazardous Waste, petroleum and petroleum products at the Facilities or the Sites;

but excluding, without limitation, the following unless caused by an Uncontrolled Circumstance listed above:

1. either Party's breach hereunder;
2. adverse changes in the financial condition of either Party or any Change in Law with respect to any taxes based on or measured by net income, or any unincorporated business, payroll, franchise or employment taxes;
3. the consequences of errors in Facilities Operation on the part of the Contractor, its employees, agents, subcontractor or affiliates, including errors in Plans and Specifications or in the Operations and Maintenance Manual that should reasonably have been identified by the Contractor, or failure to comply therewith;
4. the failure of the Contractor to secure patents, technical licenses, trademarks, and the like necessary for Facilities Operation;
5. (the lack of fitness for use of any materials, equipment or parts constituting any portion of the Facilities or the failure to comply with the Plans and Specifications for the Facilities.

10.6.b. Performance Excused

Neither Party shall be in breach of its obligations hereunder in the event, and for so long as, it is impossible or extremely impracticable for it to perform such obligations due to an Uncontrollable Circumstance if such Party exerted Reasonable Business Efforts to prevent such Uncontrollable Circumstance.

Upon the occurrence of any Uncontrollable Circumstance the County shall continue to pay the Service Fee in accordance with ARTICLE 8 for a period of fourteen (14) days. The Contractor agrees to use its Reasonable Business Efforts during such period to reduce costs and expenses related to such Uncontrollable Circumstance, and the savings, if any, shall be paid by the Contractor to the County. If the Uncontrollable Circumstance continues for more than fourteen (14) days, beginning on the fifteenth (15th) day and continuing through the sixtieth (60th) day, the County can elect not to pay the Service Fee, but to pay the Contractor's Direct Cost of operating the Facilities during the continuance of such Uncontrollable Circumstance.

Insurance proceeds from policies covering any Uncontrollable Circumstance act or event shall be used to mitigate any damages caused by insurable events.

10.6.c. Notice

The Party experiencing an Uncontrollable Circumstance and relying thereon shall give immediate Notice thereof to the other Party, including describing performance hereunder for which it seeks to be excused.

ARTICLE 11. ASSIGNMENT AND AMENDMENTS

11.1. Assignment

11.1.a. County Assignment

3. satisfactory proof that in the last five (5) years, the proposed assignee has not suffered any citation or other censure from any federal, State or local agency having jurisdiction over its operations due to any significant failure to comply with state, federal or local law, which citation or censure has not been timely cured to the satisfaction of such agency, or is not now in the process of a cure; and if it has suffered any citation or other censure, that the assignee has provided the County with a complete list thereof;
4. any other information reasonably required by the County to ensure the proposed assignee can fulfill the terms hereof, including the payment of damages, in a timely, safe and effective manner.

The Contractor shall pay the County its reasonable expenses for attorneys' fees and investigation costs necessary to investigate the suitability of any proposed assignee, and to review and finalize any documentation required as a condition for approving any such assignment.

The Routine Operations & Maintenance Cost cited on Page 1 of Attachment A is all inclusive with two exceptions -- 1) cost to remedy air emissions problems; and 2) major engine repair or parts replacement costs as detailed below.

1. The cost of the SCAQMD annual source test is covered under the Contractor's Routine Operation & Maintenance Cost. If the engine fails its annual source test, not due to the Contractor's negligent operation or maintenance, and operation of the plant must be suspended, the related downtime will not be counted as downtime against the Contractor's on-line percentage Facilities Operation Guaranty. Contractor will develop a remedial action plan and cost (including an emissions retest) and present same to County. The County can elect to proceed with the plan and authorize the Contractor to proceed under a Change Order, or can terminate Contractor's Agreement. Contractor may agree to contribute to the cost of the plan, at Contractor's sole option.
2. If an engine repair or engine parts replacement exceeding \$15,000 (per single incident) occurs (no limit in aggregate) becomes necessary, not due to Contractor's negligent operation or maintenance, Contractor will provide the County with a proposed Change Order in the form of a scope of work and cost proposal. The County can elect to authorize and pay the full amount of the Change Order, or can elect to terminate the Contractor's Agreement. Contractor may agree to contribute to the cost of the Change Order, at Contractor's sole option. Contractor shall otherwise be responsible for all repairs and parts less than \$15,000 (per single incident), regardless of fault (no limit in aggregate).

Contractor will price either of the above Change Orders at his actual cost of materials, expenses and subcontracts (without mark-up) and using the attached rate schedule which will be in effect for the life of Contractor's Agreement.

FACILITY PERMIT TO OPERATE
RIV CO., WASTE MGMT, BADLANDS LANDFILL

SECTION K: TITLE V Administration

EMERGENCY PROVISIONS

17. An emergency¹ constitutes an affirmative defense to an action brought for non-compliance with a technology-based emission limit only if:
- (A) Properly signed, contemporaneous operating records or other credible evidence demonstrate that:
 - (1) An emergency occurred and the operator can identify the cause(s) of the emergency;
 - (2) The facility was operated properly (i.e. operated and maintained in accordance with the manufacturer's specifications, and in compliance with all regulatory requirements or a compliance plan), before the emergency occurred;
 - (3) The operator took all reasonable steps to minimize levels of emissions that exceeded emissions standard, or other requirements in the permit; and,
 - (4) The operator submitted a written notice of the emergency to the AQMD within two working days of the time when the emissions limitations were exceeded due to the emergency. The notice shall contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken; and
 - (B) The operator complies with the breakdown provisions of Rule 430 - Breakdown Provisions, or subdivision (i) of Rule 2004 - Requirements, whichever is applicable. [3002(g), 430, 2004(i)]
18. The operator is excused from complying with any regulatory requirement that is suspended by the Executive Officer during a state of emergency or state of war emergency, in accordance with Rule 118 - Emergencies. [118]

¹ "Emergency" means any situation arising from sudden and reasonably unforeseeable events beyond the control of the operator, including acts of God, which: (A) requires immediate corrective action to restore normal operation; and (B) causes the facility to exceed a technology-based emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency; and (C) is not caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error.

RECORDKEEPING PROVISIONS

19. In addition to any other recordkeeping requirements specified elsewhere in this permit, the operator shall keep records of required monitoring information, where applicable, that include:
- (A) The date, place as defined in the Title V permit, and time of sampling or measurements;
 - (B) The date(s) analyses were performed;
 - (C) The company or entity that performed the analyses;
 - (D) The analytical techniques or methods used;
 - (E) The results of such analyses; and
 - (F) The operating conditions as existing at the time of sampling or measurement. [3004(a)(4)(B)]
20. The operator shall maintain records pursuant to Rule 109 and any applicable material safety data sheet (MSDS) for any equipment claimed to be exempt from a written permit by Rule 219 based on the information in those records. [219(t)]
21. The operator shall keep all records of monitoring data required by this permit or by regulatory requirements for a period of at least five years from the date of the monitoring sample, measurement, report, or application. [3004(a)(4)(E)]

REPORTING PROVISIONS

22. The operator shall comply with the following requirements for prompt reporting of deviations:
- (A) Breakdowns shall be reported as required by Rule 430 - Breakdown Provisions or subdivision (i) of Rule 2004 - Requirements, whichever is applicable.
 - (B) Other deviations from permit or applicable rule emission limitations, equipment operating conditions, or work practice standards, determined by observation or by any monitoring or testing required by the permit or applicable rules that result in emissions greater than those allowed by the permit or applicable rules shall be reported within 72 hours (unless a shorter reporting period is specified in an applicable State or Federal Regulation) of discovery of the deviation by contacting AQMD enforcement personnel assigned to this facility or otherwise calling (800) CUT-SMOG.

~~FACILITY PERMIT TO OPERATE~~
RIV CO., WASTE MGMT, BADLANDS LANDFILL

~~SECTION K. TITLE V Administration~~

- (C) A written report of such deviations reported pursuant to (B), and any corrective actions or preventative measures taken, shall be submitted to AQMD, in an AQMD approved format, within 14 days of discovery of the deviation.
 - (D) All other deviations shall be reported with the monitoring report required by condition no. 23. [3004(a)(5)]
23. Unless more frequent reporting of monitoring results are specified in other permit conditions or in regulatory requirements, the operator shall submit reports of any required monitoring to the AQMD at least twice per year. The report shall include a) a statement whether all monitoring required by the permit was conducted; and b) identification of all instances of deviations from permit or regulatory requirements. A report for the first six calendar months of the year is due by August 31 and a report for the last six calendar months of the year is due by February 28. [3004(a)(4)(F)]
24. The operator shall submit to the Executive Officer and to the Environmental Protection Agency (EPA), an annual compliance certification. For RECLAIM facilities, the certification is due when the Annual Permit Emissions Program (APEP) report is due and shall cover the same reporting period. For other facilities, the certification is due on March 1 for the previous calendar year. The certification need not include the period preceding the date the initial Title V permit was issued. Each compliance certification shall include:
- (A) Identification of each permit term or condition that is the basis of the certification;
 - (B) The compliance status during the reporting period;
 - (C) Whether compliance was continuous or intermittent;
 - (D) The method(s) used to determine compliance over the reporting period and currently, and
 - (E) Any other facts specifically required by the Executive Officer to determine compliance.

The EPA copy of the certification shall be sent to: Director of the Air Division Attn: Air-3 USEPA, Region IX 75 Hawthorne St. San Francisco, CA 94105
[3004(a)(10)(E)]

25. All records, reports, and documents required to be submitted by a Title V operator to AQMD or EPA shall contain a certification of accuracy consistent with Rule 3003(c)(7) by a responsible official (as defined in Rule 3000). [3004(a)(12)]

APPENDIX B: RULE EMISSION LIMITS [RULE 404 2-7-1986]

The operator shall not discharge into the atmosphere from this equipment, particulate matter in excess of the concentration at standard conditions, shown in Table 404(a). Where the volume discharged is between figures listed in the Table, the exact concentration permitted to be discharged shall be determined by linear interpolation.

For the purposes of this rule, emissions shall be averaged over one complete cycle of operation or one hour, whichever is the lesser time period.
