SUBJECT: Ratify the First Amendment between the County of Riverside Department of Public Health (DOPH) and the Hospital Association of Southern California (HASC) - #11-043

BACKGROUND:

On December 7, 2010, Item #3.6, the Chairman of the Board signed the agreement with the Hospital Association of Southern California (HASC) to upgrade ReddiNet Emergency Medical Communications System, from a microwave system to a satellite system for 15 hospitals for Public Health Emergency Preparedness and Response (PHEPR) and Emergency Medical Services (EMS) agency, in the amount of \$170,000 for FY 2010-2011.

ReddiNet is a system that is used by the Department of Public Health to manage multi-casualty events, monitor components of hospital status, and track bed availability. In the event of a disaster, ReddiNet will provide real-time information that will allow emergency managers to better coordinate response efforts between the field and the hospital emergency department. The satellite system will provide redundancy to the ReddiNet infrastructure to ensure system viability.

FINANCIAL BACKGROUND: \$170,000 has been approved by U.S. Department of Health and Human Services through the Hospital Preparedness Program (HPP) for the ReddiNet Emergency Medical Communications System upgrade to a satellite system.

ReddiNet is an essential component of disaster and bioterrorism preparedness and the mechanism by which all of the above entities communicate. ReddiNet is critical in that it allows for the rapid dissemination of information during response activities. Upgrading will make ReddiNet much more reliable, expandable, and a vastly superior system. It will enhance the system's capacity to withstand almost any type of interruption caused from severe weather or high magnitude earthquake.

2. **DELIVERABLES:**
CONTRACTOR will provide satellite dish, modems, cabling, site survey, architectural drawings, Office of Statewide Health Planning & Development (OSHPD) documents, filings, and approvals. Each hospital will construct its own penetrating mount (roof) by its own facility workforce or outside contractor.
