Orange Street Lateral, Stage 1

Project No. 3-0-00012

Engineer's Statement

The proposed project is located within unincorporated Riverside County, California, near the city of Lake Elsinore. The proposed project is a storm drain system designed to collect runoff tributary to Orange Street and discharge the flows to the Lime Street Channel. When complete, this storm drain system will provide protection for residential properties along Orange Street and neighboring areas.

The proposed project consists of approximately 700 lineal feet of reinforced concrete storm drain pipe (RCP) that will connect to the District's existing concrete lined trapezoidal Lime Street Channel. The proposed project begins at the Lime Street Channel and terminates approximately 350 feet southeasterly of the intersection of Fairview Street and Orange Street. A water quality feature is also proposed to be constructed to collect sediment and debris prior to entering the storm drain system. The proposed project area may be found within Township 6 South, Range 5 West, Section 10 of the Alberhill 7.5 Series USGS Topographic Quadrangle map. The cost of the proposed project is approximately \$349,000.
