Public Safety Enterprise Communication Project Executive Steering Committee  
Form 11: Amendment to Schedule A Equipment Lease-Purchase of Portable And  
Mobile Radios

Page 2

**BACKGROUND:** (Continued)

In summary, the Motorola contract provides for the implementation of the project including site/tower construction, equipment installation at 76 sites, and replacement of portable and mobile radios.

In 2010, Motorola advised the county of a leasing option for the purchase of all portable and mobile radios. Under the lease purchase option approved on June 15, 2010, item 3.20, county departments could enter into a 10-year, fixed-rate lease with a dollar buyout for their needed radios; including the radios they had on hand at the start of the project in 2007 (total of 3200), as well as for the growth in units since that time (1507).

The attached Amendment 2 to the Lease and Schedule includes a substitution of collateral in the agreement from subscriber equipment to infrastructure equipment. The amount financed, the lease payment schedule, and the interest rate remains exactly the same; there is no additional cost to the county for the equipment substitution. This change will better align asset life expectancy with the lease term. The change will allow the lease expense and replacement costs to be spread across the entire system and factored into PSEC post implementation rates.

Moving to a lease on the infrastructure equipment would:

- Free county departments from the funding responsibility of equipment lease costs
- Allocate radios to each county department by swapping out old radios for new ones that come with a 2-year warranty and a 10+ year life expectancy.
- Enable county departments to plan ahead for budget needs, based on usage.

The substitution of collateral does not alter the economic terms or the term length but it does trigger the need for an amendment to the existing license agreement.
