The Honorable Board of Supervisors

RE: Mission Boulevard Rehabilitation Project, City of Jurupa Valley.

March 8, 2012

Page 2 of 2

**BACKGROUND:** The Transportation Improvement Program (TIP) provides for the rehabilitation of an approximate 900-foot segment of Mission Boulevard between the SR-60 eastbound off-ramp and the SR-60 westbound on-ramp in the City of Jurupa Valley.

Caltrans is currently working on plans to install a new traffic signal at the westbound SR-60 on ramp at Mission Boulevard. The County considered adding this rehabilitation work to the Caltrans project to minimize disruption to the public and for efficiency, however, the pavement condition is deteriorating rapidly due to the high volume of truck traffic.

The County decided to move ahead and rehabilitate the pavement work now, rather than waiting to include it in the Caltrans signal project. This project was substantially along in the design/planning and funding stages prior to City incorporation.

The proposed road improvements include cold plane, remove existing pavement, placing new asphalt concrete pavement including subgrade enhancement fabric. Additional improvements include installation of detector loops, striping, and thermoplastic pavement markings, adjust manholes to grade, and other associated work.

The bid documents include the following schedules of work:

- Base Bid: Primary items of work on Mission Boulevard.
- Alternate 1: Adjustment of manholes to grade, to be funded by the Jurupa Community Services District.

If the Jurupa Community Services District (JCSD) concurs with bid prices, as bid by the apparent low bidder, the alternate bid schedule will be included with the contract award and the costs for the work will be funded by JCSD.

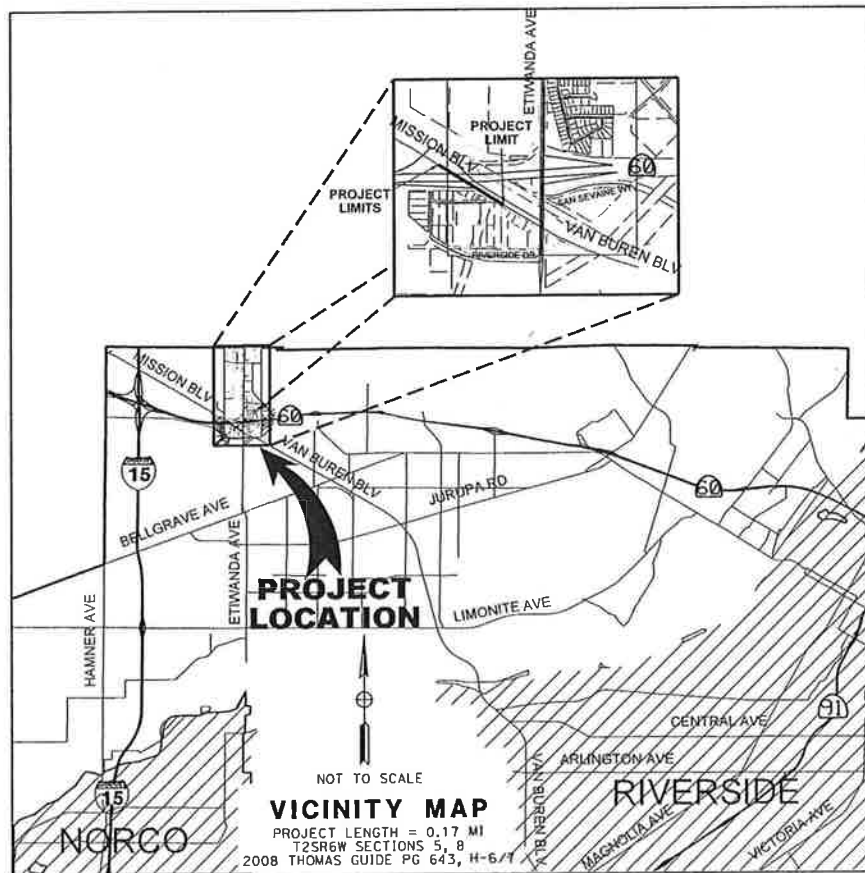

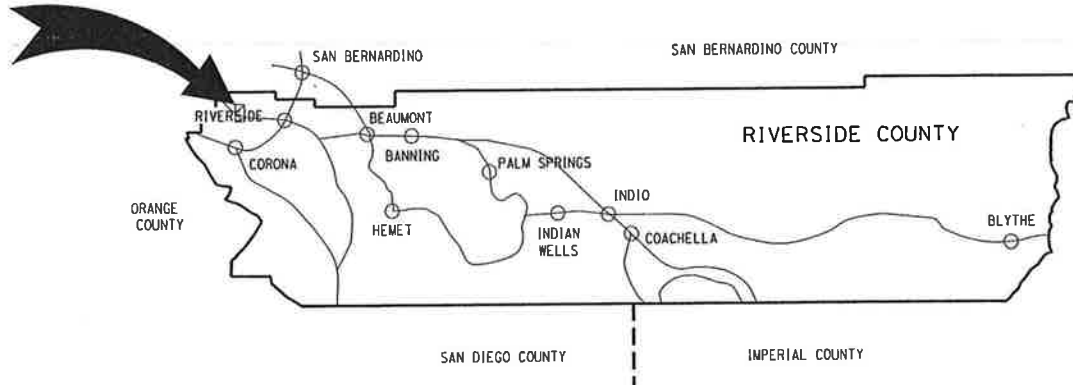

The submitted plans and specifications have been approved as to form by County Counsel.

Environmental clearance is complete.
