The Honorable Board of Supervisors

RE: FY 2011/2012 Slurry Seal Project Group B at various locations in the 1st and 3rd Districts.

April 19, 2012

Page 2 of 2

BACKGROUND: This is a regular preventative maintenance project performed to extend the pavement life of suitable roads in Riverside County. In order to obtain a more efficient performance of work, this year the slurry seal project has been divided in two parts, Spring Group A and Summer Group B.

The first Group, Spring 2012 (Group A), including various streets located within the 4th and 5th Districts, is currently in construction.

Slurry Seal Project Group B includes various streets located within the 1st and 3rd Districts. The specific project roads for Summer 2012 are listed in Attachment "1".

Slurry seal was applied to streets in the Coronita and Home Gardens areas of District 2 as part of the previous slurry project performed during the Summers of 2009, 2010, and 2011.

The slurry seal treatment consists of an application of emulsified asphalt (a mixture made from oil and fine sand aggregates).

This project includes road cleaning, crack repairs, slurry seal treatment, installation of new thermoplastic crosswalks, pavement markings and raised pavement markers.

All roads will be swept several times, at specified intervals, after the slurry has been applied.

The submitted plans and specifications have been approved as to form by County Counsel.

Environmental clearance is complete.

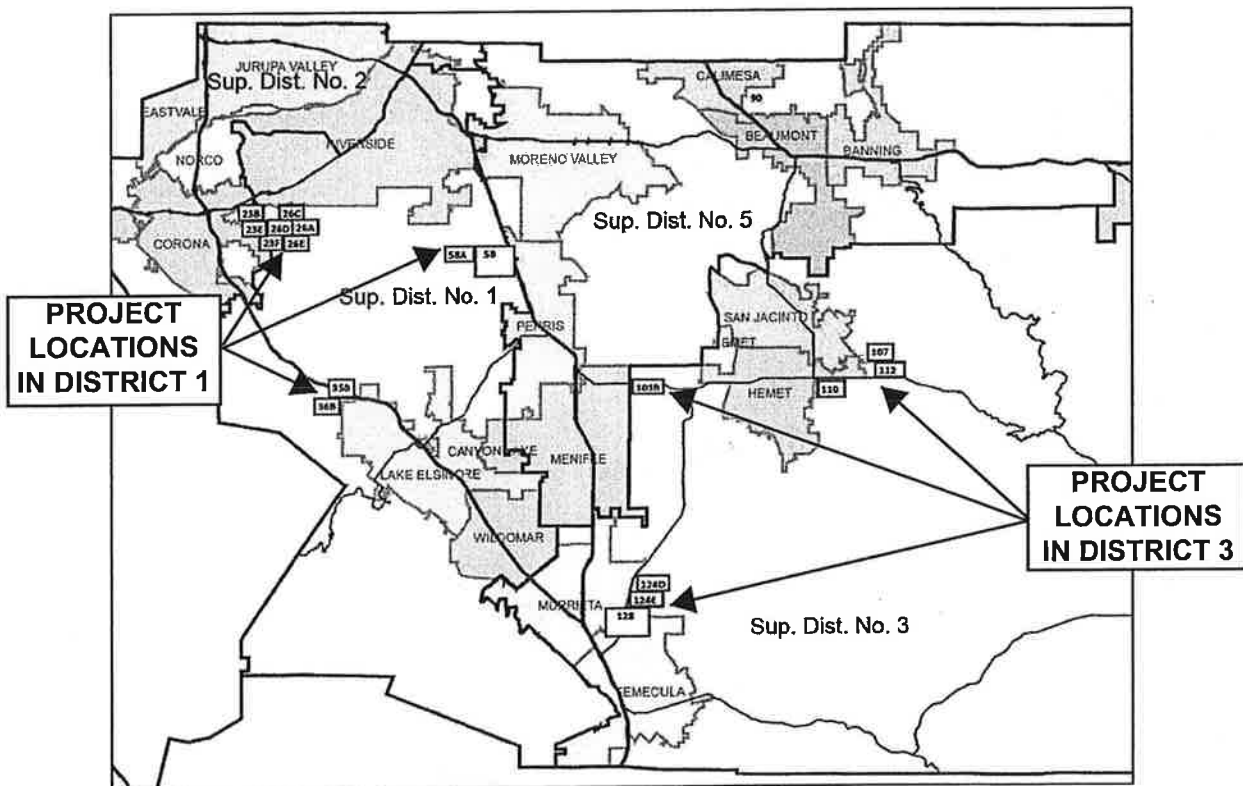

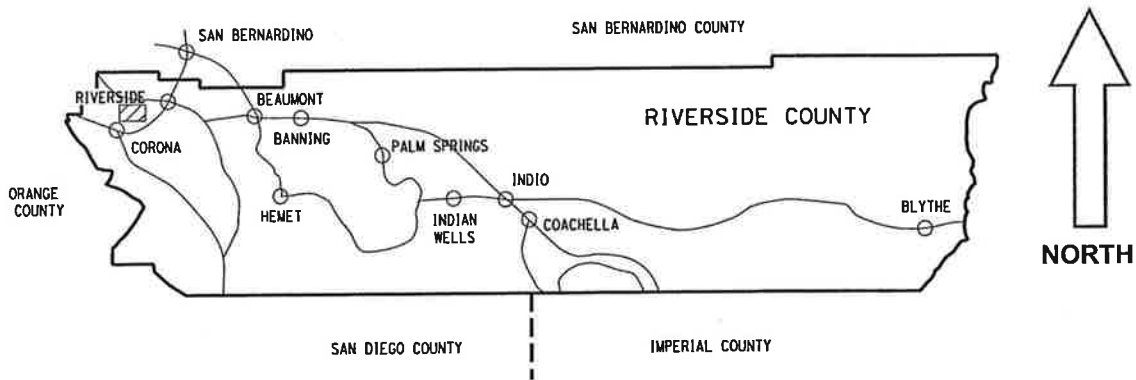

Project No.: C2-0006 and C2-0008
