SUBJECT: Ratify the Agreements between Riverside County Department of Public Health (RCDOPH) and all Sixteen (16) Hospitals in Riverside County for the Hospital Preparedness Program.

BACKGROUND (CONTINUED):

In 2006, Riverside County's purchasing agent signed multi-year agreements with fifteen (15) hospitals (Corona Regional Medical Center, Desert Regional Medical Center, Eisenhower Medical Center, Hemet Valley Medical Center, Inland Valley Medical Center, John F Kennedy Memorial Hospital, Kaiser Foundation Hospital-Riverside, Menifee Valley Medical Center, San Geronio Memorial Hospital, Kaiser Permanente-Moreno Valley Community Hospital, Palo Verde Hospital, Riverside Community Hospital, Rancho Springs Medical Center, Parkview Community Hospital and Riverside County Regional Medical Center) in order to improve and maintain disaster preparedness.

These improvements include the development and implementation of regional all-hazards emergency preparedness plans and protocols to improve the capacity of healthcare systems (hospitals, skilled nursing/long term care facilities, EMS systems, surgical and outpatient centers, clinics and other collaborating health care entities) for response to an incident.

Through these agreements, RCDOPH provides healthcare facilities equipment such as: surge, decontamination, response trailers, personal protection equipment, radios and evacuation to enhance their preparedness capacity during emergencies. Each hospital's agreement states the inventory of equipment received and the proper handling, securing and maintenance of the equipment. These agreements include one new hospital that opened in 2011 (Loma Linda University Medical Center – Murrieta) for a total of 16 agreements.

FINANCIAL INFORMATION:

All the equipment included in each agreement was purchased with previous years Hospital Preparedness Program grant funds. No funds are required to maintain these agreements.

**AGREEMENT BETWEEN THE COUNTY OF RIVERSIDE, DEPARTMENT OF PUBLIC
HEALTH AND CORONA REGIONAL MEDICAL CENTER
FOR THE GRANT OF HOSPITAL PREPAREDNESS EQUIPMENT, SUPPLIES AND
RESOURCES**

BACKGROUND

The Hospital Preparedness Program (HPP) provides leadership and funding through grants and cooperative agreements to States, territories, and eligible municipalities to improve surge capacity and enhance the medical health community's preparedness for public health emergencies. HPP is managed by the Office of the Assistant Secretary for Preparedness and Response, (ASPR) which provides programmatic oversight and works with its partners in State, territorial, and municipal government to ensure that the program's goals are met or exceeded. The Office of the Assistant Secretary for Preparedness and Response (formerly the Office of Public Health Emergency Preparedness) was created under the Pandemic and All Hazards Preparedness Act in the wake of hurricane Katrina to lead the nation in preventing, preparing for, and responding to the adverse health effects of public health emergencies and disasters. ASPR focuses on preparedness planning and response; building federal emergency medical operational capabilities; countermeasures research, advance development, and procurement; and grants to strengthen the capabilities of hospitals and health care systems in public health emergencies and medical disasters. The office provides federal support, including medical professionals through ASPR's National Disaster Medical System, to augment state and local capabilities during an emergency or disaster. The program is administered in California by the California Department of Health Services through the local public health agencies.

The purpose of the cooperative agreement program is to upgrade the preparedness of the Nation's hospitals and other healthcare facilities such as: Skilled Nursing/Long Term Care Facilities, Clinics, Surgical Centers and collaborating entities to develop and maintain disaster preparedness. This includes the development and implementation of regional all-hazards emergency preparedness plans and protocols to improve the capacity of healthcare systems (hospitals, skilled nursing/long term care facilities, EMS systems, surgical and outpatient centers, clinics and other collaborating health care entities) for response to an incident.
