### **BOARD OF SUPERVISORS**

FORM 11: RCIT Budget Adjustments Related to Assuming Responsibility of Technology Services for the Transportation Land Management Agency (TLMA)

June 11, 2012 Page 2

### BACKGROUND:

As a result of the ongoing collaboration with departments, the Departmental Systems Bureau (DSB) has been established within RCIT organization to facilitate the transitioning of departmental services into the RCIT organization. As RCIT collaborates with county departments, the DSB will work to transition IT service as requested by departments via a service agreement.

It has been identified that there are cost saving opportunities (estimated at over \$800,000) with assuming technology services for TLMA information technology and GIS. As a result a total of thirty-five TLMA positions will transition to the RCIT organization. Nine (9) GIS positions will remain dedicated to supporting GIS functions resulting in the GIS fund transferring to RCIT to support these operations. Attachment A reflects the requested GIS budget allocations. Twenty-six (26) positions supporting central TLMA IT functions will transfer into the RCIT operational budget. The requested budget adjustments in Attachment B reflect these changes.

As RCIT assumes technology services responsibilities for departments, service agreements will be developed and associated costs to support the services will be billed back to the department. Transition rates have been developed to cover direct salary and basic support costs for the transition staff. Any IT equipment purchases made on behalf of a department will be billed as a direct pass-thru. This will be the transition model we will follow until the new IT staff and services are fully integrated into the RCIT organization. Attachment C reflects the new rates related to departmental service agreements.

RCIT is already engaged with the Registrar of Voters (ROV) to provide IT services and that partnership has been very successful with ROV expecting to achieve an estimated cost savings of at least \$300,000. As additional departments request RCIT to assume their technology services we will return to the Board for any necessary budget adjustments.

RCIT looks forward to further collaboration with county departments and is confident that cost savings can be achieved through unified efforts.
