**BACKGROUND:** On March 23, 2010 (3.34), the Board of Supervisor approved a three (3) year agreement with the option of two (2) one-year renewal periods with Systems Integration Corporation (SI) to provide Integrated Security and Electronics Maintenance at all five County jails. The final cost over the five (5) year contract period was set at \$4,031,900.

On May 24, 2011 (3.46), the Board approved the first amendment to the SI agreement to cover jail security upgrades of \$338,092 and maintenance fees of \$143,364 associated with the upgrades. On November 1, 2011 (3.31), the Board approved the second and third amendment to the SI agreement, deleting the maintenance costs of the Old Jail totaling \$147,742 and adding the security maintenance costs of \$674,151 for the Smith Correctional Facility Expansion, for a combined total of \$526,409. Now the Sheriff's Department is recommending approval of the fourth amendment to the SI agreement.

As a result of AB109, security surveys were conducted at each facility. The Sheriff's Department identified several areas in need of additional cameras to prevent escapes and provide adequate perimeter security. To resolve the identified security concerns, the Southwest Detention Center (SWDC) required replacement and upgrade of the existing security digital video recording systems with expandable network video recording systems. The new network video recording system's capacity is sufficient to support additional cameras to record surveillance areas. The capacity of the new system is large enough to archive the recordings, which is essential for facility security and investigations. In addition, SWDC added security cameras to all inmate housing units and to the exterior perimeter of the facility.

The Smith Correctional Facility (SCF) added security cameras to the kitchen, face to face visiting area and 48 cells in the new expansion. These cells will be used for inmates with mental health issues who need additional monitoring. A fire alarm control panel was added to the new warehouse per code requirements. SCF will also be adding video visitation consoles and infrastructure connected to the existing video visiting head end equipment. The Indio Jail added one camera to a cell for increased visual supervision and additional servers for recording existing cameras.

The equipment and installation costs for these projects total \$597,534. The increased maintenance cost for the added equipment for nine months of the contract year is \$31,494.

The contract maintenance costs for years four and five are \$1,064,980 and \$1,105,795, respectively.

**Price Reasonableness:** For the security upgrades covered here, SI priced the projects with a discount of at least 25%, exceeding the 20% required contractually.

Per the agreement with SI, the County reserves the rights to add, update, modify and improve any system using the contractor of its choice. However, Department staff does not believe it is sensible to piecemeal maintenance efforts

for the security equipment among a number of contractors. The cost for added preventative maintenance schedules at SWDC, SCF and Indio Jail was negotiated between Sheriff's Corrections staff and SI.
