**FLOOD CONTROL AND WATER CONSERVATION DISTRICT BOARD SUBMITTAL
COUNTY OF RIVERSIDE, STATE OF CALIFORNIA**

SUBJECT: Renew the Annual Maintenance and Support for SunGard Public Sector Software, Renew the Disaster Recovery Services with SunGard Public Sector and Procure the IFAS Contracts Module from SunGard Public Sector

SUBMITTAL DATE: 7/31/2012

Page 2

BACKGROUND CONTINUED:

The IFAS software from SunGard Public Sector facilitates the District's project cost accounting needs by enabling the District to record revenue and expenditures/expenses at various levels or segments of its 18-digit project string, generate project reports in detail or in summary by project level or segment, allocate overhead costs and reimbursement costs to various District funds at a project level and record the associated revenue, if any, to the appropriate District internal service fund for budget analysis and billing purposes, and to maintain legacy data at a project level to meet GASB 34 reporting audit requirements, and audit requirements for cooperatively funded projects with Counties, Cities, other local agencies and State and Federal governments. The IFAS system is central to the District's project cost accounting operations and has been in use for many years. Through maintenance services from SunGard Public Sector, the District will continue to receive periodic software upgrades, disaster recovery services and technical support through fiscal year 2012-2013.

Technical support is needed to resolve software problems and system malfunctions, and to provide support during major software upgrades. The Disaster Recovery Services include IFAS system replication, including database and systems software to a remote facility which would be on standby and ready to deploy in the event of a disaster or major emergency. The software maintenance services provided by SunGard Public Sector will make available periodic software patches and upgrades to the District. This will allow the District to upgrade to the newest version of the software without expending additional costs.

The IFAS contract module, proprietary to SunGard Public Sector, is needed to improve efficiency in contract administration and will be primarily used to track task orders issued against approved contracts, and more specifically, to track costs by zone and project within each contract. The module is structured to work with the District's project accounting system and will be used to capture and manage costs incurred for contracted design, construction, plan check, environmental, maintenance and inspection services by task order, zone and project number associated with developer and District designed and constructed facilities. Implementation of this software will provide District project managers with the necessary tools to more effectively and accurately manage and report costs for multiple projects against multi-year, on-call service contracts as well as forecast costs, project plan and prepare budget documents.

This is a sole source purchase since the maintenance and support of IFAS software, the Disaster Recovery Services and the IFAS contract module are proprietary to SunGard Public Sector and no other supplier provides software upgrades, license renewals, and technical support for the IFAS software.

FINANCIAL:

Funds for the software maintenance/support, disaster recovery services and contracts module are included in the District's Data Processing budget for FY 2012-2013.

MEMORANDUM
RIVERSIDE COUNTY FLOOD CONTROL
AND WATER CONSERVATION DISTRICT

DATE: July 18, 2012

TO: Board of Supervisors
VIA: Purchasing Agent
FROM: ^{For} Warren D. Williams, General Manager-Chief Engineer
RE: Sole Source Procurement – SunGard Public Sector
Request for (A) Renew Annual Maintenance/Support, (B) Renew Disaster Recovery Services and (C) Procure IFAS Contracts Module

The information provided below is in support of the District requesting approval for a sole source. Outside of a duly declared emergency, the time to develop a statement of work or specifications is not in itself justification for sole source.

1. **Supply/Service being requested:** (A) Renew Annual Maintenance/Support, (B) Renew Disaster Recovery Services and (C) Procure IFAS Contracts Module
2. **Supplier being requested:** SunGard Public Sector
3. **Alternative suppliers that can or might be able to provide supply/service:** IFAS software is proprietary to SunGard Public Sector. No other supplier provides software upgrades, license renewals and technical support for IFAS software due to its proprietary nature.
4. **Extent of market search conducted:** None
5. **Unique features of the supply/service being requested from this supplier, which no alternative supplier can provide:**

(A) & (B) No other supplier provides software upgrades, license renewals and technical support for IFAS software due to its proprietary nature. Through SunGard's Disaster Recovery Services we currently have a duplicate image of our IFAS system at their Chico, CA offices. In the event of a major disaster in which our site is compromised, we can be functional within hours and work remotely. The continuation of these services is vital to our business continuity plans.

(C) SunGard's contract module is specifically designed for tracking task orders issued against approved contracts, and more specifically, tracking costs per zone and project within each contract. The module is geared toward District's project accounting and is needed to effectively capture and manage costs incurred for contracted design, construction, plan check, environmental, maintenance and inspection services by task order, zone and project number associated with developer and District designed and constructed facilities.
6. **Reasons why my department requires these unique features and what benefit will accrue to the county:**

(A) The IFAS system is central to the District's project cost accounting operations and has been in use for many years. It facilitates the District's project cost accounting needs by enabling the District to record revenue and expenditures/expenses at various levels, generate project reports in detail or in summary by project level or segment, allocate overhead and reimbursement costs to various District funds at a project level, and to maintain legacy data at a project level to meet GASB 34 reporting and audit requirements for cooperatively funded projects with counties, cities, other local agencies, and the State and Federal governments.

TO: Board of Supervisors

RE: Sole Source Procurement – SunGard Public Sector
Request for (A) Renew Annual Maintenance/Support, (B) Renew Disaster Recovery Services and (C) Procure II'AS Contracts Module

(B) SunGard Public Sector provides a mirrored site of the IFAS system at their Chico headquarters. The IFAS database is uploaded on a nightly basis. This alternate site is available in the event of a major disaster.

(C) SunGard's contract module provides the District with the ability to capture activity-based costs at a zone and project number level within a given task order against an approved contract. It is important for District project managers to more effectively and accurately manage and report costs for multiple projects against multi-year, on-call service contracts as well as forecast future costs, project plan and prepare budget documents.

7. Price Reasonableness including purchase price and any ongoing maintenance or ancillary costs from the supplier:

(A) FY 12/13 \$24,489.54 compared to FY 11/12 \$23,331.45. *Costs comparable to or less than other vendors providing similar software maintenance.*

(B) FY 12/13 \$23,000.00 compared to FY 11/12 \$23,000.00. *Costs comparable to or less than other vendors providing similar software maintenance.*

(C) FY 12/13 \$27,092.00 *(Includes training, software installation, license fees, professional services, maintenance).*

These are State/Local government rates and are based on users. The lowest rate charged comparable customers.

8. Does moving forward on this product or service further obligate the county to future similar contractual arrangements or any ongoing costs affiliated with this sole source? No

9. Period of Performance: July 1, 2012 to June 30, 2013
