The Honorable Board of Supervisors

RE: Construction of traffic signal at the intersection of Harrison Street and 66th Avenue,
Coachella Valley area.

August 16, 2012

Page 2 of 2

BACKGROUND: The Transportation Improvement Program provides for the construction of a traffic signal, street improvement, and storm drain improvement at the intersection of Harrison Street and 66th Avenue, in the Coachella Valley area. The proposed traffic signal will improve safety by providing protected traffic movements and pedestrian crossings.

Additionally, Harrison Street will be widened to add an additional through lane in both directions to increase traffic capacity, 66th Avenue will be widened to facilitate truck turning movements, and new ADA compliant curb ramps will be installed on all four corners of the intersection. Due to roadway widening, drainage improvements will include removal of existing headwalls, extension of existing culvert crossing Harrison Street, and installation of new storm drain laterals, asphalt concrete dike, and a catch basin. This project will also provide striping and signing improvements at the intersection.

These proposed improvements are within the County's right of way (ROW) and partially within privately owned property; accordingly, ROW acquisition was necessary on the northwest and southeast corners of the proposed traffic signal project. The Board authorized the acquisition of property to build the proposed improvements on June 8, 2010 (Item 3.34) and on August 10, 2010 (Item 3.35).

Annual traffic signal operation and maintenance costs are estimated at \$5,500 to be funded from gas tax.

The submitted plans and specifications have been approved as to form by County Counsel.

Environmental clearance is complete.
