BACKGROUND:

In accordance with Board Policy A-18 and in accordance with Ordinance 459.4; the agreement with Riverside Community College District (RCCD) was developed without securing competitive bids for educational services in the amount not to exceed \$34,300 on an annual basis- to provide a curriculum for RCRMC's medical surgical nurse residency program. In order to supply the need for appropriately trained registered nurses (RN's), a residency is necessary. The course for NRN200 [Transition to Practice Medical-Surgical Training] is taken by the potential employee and upon successful completion; RCRMC has the ability to hire based upon the RN's performance during the class/clinical time as a non-employee.

PRICE REASONABLENESS:

It is anticipated to decrease the cost of providing a nurse residency as the class does not require a participant be hired prior to admission. No other costs are anticipated. Annual expenditure-- \$34,300.

FINANCIAL IMPACT:

100% Hospital Funds

Subject: Sole Source Procurement; Request for Riverside Community College District Educational Services Agreement, NRN 200 – 4 Units Transition to Practice Medical-Surgical Training

The below information is provided in support of my Department requesting approval for a sole source. Outside of a duly declared emergency, the time to develop a statement of work or specifications is not in itself justification for sole source.

1. Supply/Service being requested:

Provision of Transition to Practice Curriculum including the following: Curriculum development, classroom space, simulation lab, and faculty. This twelve week program constitutes our Medical-Surgical Nurse Residency program.

2. Supplier being requested:

Riverside Community College District

3. Alternative suppliers that can or might be able to provide supply/service:

None available

4. Extent of market search conducted:

Discussion with various nursing programs none able to provide additional services. Program must be located in close proximity to Riverside County Regional Medical Center. Program was developed and previously provided under a grant obtained by RCCD.

5. Unique features of the supply/service being requested from this supplier, which no alternative supplier can provide:

Location of provider, cost of service, and the only other school located optimally in proximity to our facility is California Baptist University with prohibitive admission and cost per unit restrictions.

6. Reasons why my department requires these unique features and what benefit will accrue to the county:

Currently, RCRMC has limited classroom space, educational faculty, and only one adult simulation trainer. In order to supply the need for appropriately trained registered nurses a residency is necessary. RCCD due to classroom availability is able to accept larger amounts of students at one time effectively doubling our ability to train new nurses via residency. The class is taken by the potential employee and upon successful completion RCRMC has the ability to hire based upon the Registered Nurse's performance during the class/clinical time as a non-employee.

7. Price Reasonableness including purchase price and any ongoing maintenance or ancillary costs from the supplier:

It is anticipated to decrease the cost of providing a nurse residency as the class does not require that a participant be hired prior to admission. No other costs are anticipated. Maximum amount not to exceed \$34,300 annually.
