The use of the generators at four sites was extended as negotiations with tribal councils and forest service took longer than anticipated. Additionally, Southern California Edison (SCE) was not able to expedite the design and installation of the commercial power. Commercial power will soon be available at the sites and a diesel power plant will be installed at Toro Peak as we were not able to obtain power from the tribal lands adjacent to the site as was initially planned. The Expedia amendment provides for the additional rental and maintenance of the generators at these sites in the case of power failure.

Price Reasonableness:

Purchasing released a Request for Proposal, ITARC075 mailing solicitations to 12 companies and advertised on the County's Internet with five responses received. The proposals were reviewed by an evaluation team consisting of personnel from Purchasing and Information Technology. The evaluation team reviewed and scored each proposal based on the bidder's overall responsiveness to the requirements of the scope of service, the ability to perform, equipment capability, references and the overall cost. The evaluation committee determined that Expedia Power was the lowest responsive/responsible vendor at \$63,525. The other bidders proposed fees ranged from \$70,723 to \$149,000. The amendment extends the competitive pricing for the additional use at the sites.
