**Review Stage:** First Review

**Information Provided:** "Washington Street at Van Buren Boulevard, Commercial Project, Noise Impact Analysis, County of Riverside, California" dated December 15, 2010 JN: 06993-02

**Noise Standards:**

**For Stationary Noise Sources:**

**A. Standards:**

Facility-related noise, as projected to any portion of any surrounding property containing a "habitable dwelling, hospital, school, library or nursing home", must not exceed the following worst-case noise levels:

- a) 45 dB(A) – 10 minute noise equivalent level ("leq"), between the hours of 10:00 p.m. to 7:00 a.m. (nighttime standard).
- b) 65 dB (A) – 10 minute leq, between 7:00 a.m. and 10:00 p.m. (daytime standard).

**B. Requirement for Determination of Community Noise Impact:**

a) Noise originating from operations within the facility grounds shall be treated as "stationary" noise sources for which this standard will apply.

b) Noise Modeling Methodology: Noise predictions are to be made by an engineer, acoustical consultant or other similar professional with experience in predicting community noise exposure using standard methods and practices of the noise consulting industry.

c) Required Modeling Parameters for Stationary Sources:

- i. Stationary sources are to be modeled as "point" sources.
- ii. Mobile point sources are to be modeled as emanating from the acoustical centroid of the activity, or at its closest approach to potentially impacted residential property lines, which ever yields the worst-case results.
- iii. Noise modeling for each piece of acoustical equipment, process or activity must be based on Reference Noise Levels (RNL). RNL may be obtained directly from the manufacturer (in case of equipment) or generated from field studies. Regardless, the data must be representative of worst-case conditions. Directionality of the noise source must be taken into consideration if applicable.
- iv. Predicted noise levels are to be expressed in terms of worst-case "equivalent continuous sound levels" [or, Leq] averaged over a ten minute period.
- v. For modeling purposes, receivers are assumed to be positioned at the

property line boundary at an elevation of five feet off the ground.

- vi. Terrain conditions for modeling noise propagation: Assumptions regarding ground effects, atmospheric absorption and other forms of noise attenuation must be fully justified.

### **Findings:**

The consultant's report is adequate. Based on our calculations the recommendation listed below should provide sufficient attenuation to reduce the exterior noise levels to below 65 dB (A) during the day and 45 dB (A) at night.

### **Recommendations:**

The following conditions shall be applied to the project based on the information provided by the acoustical consultant:

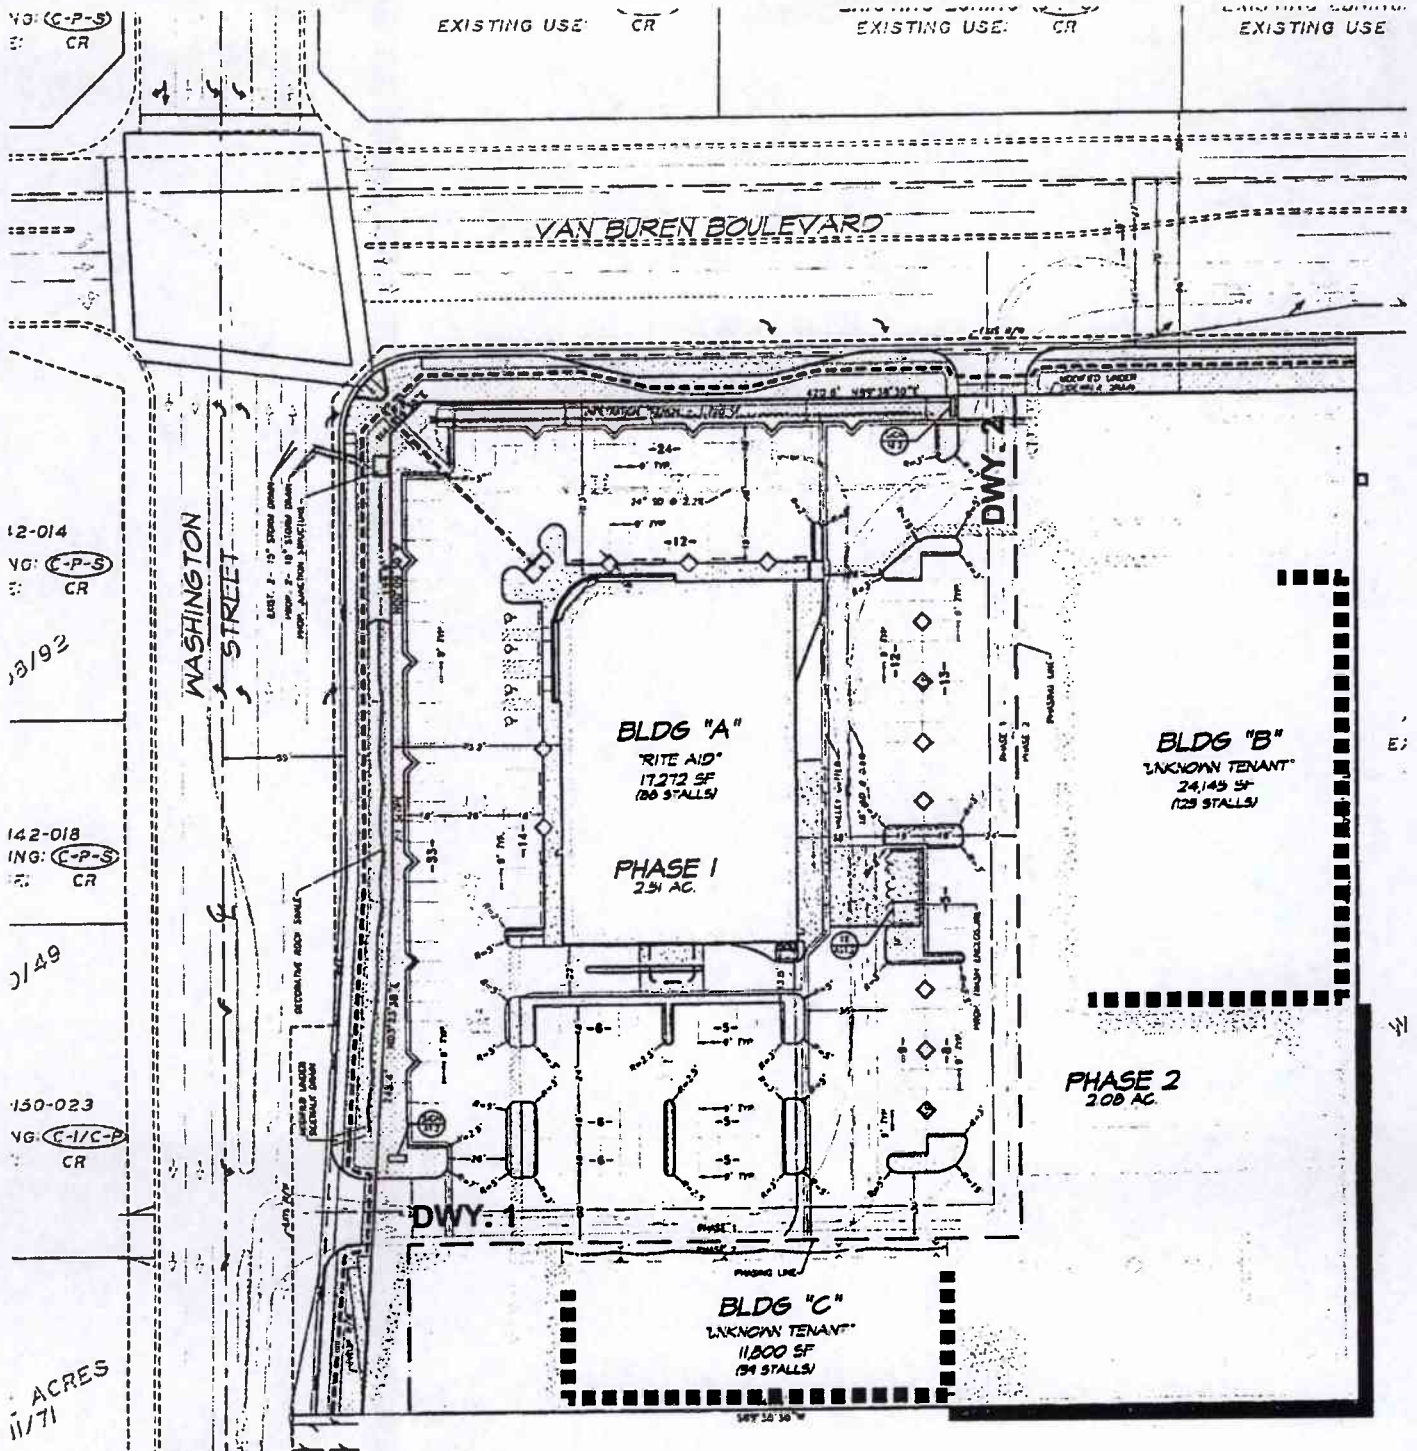

1. Facility-related noise, as projected to any portion of any surrounding property containing a "sensitive receiver, habitable dwelling, hospital, school, library or nursing home", must not exceed the following worst-case noise levels 45 dB(A) – 10 minute noise equivalent level ("leq"), between the hours of 10:00 p.m. to 7:00 a.m. (nighttime standard) and 65 dB (A) – 10 minute leq, between 7:00 a.m. and 10:00 p. m. (daytime standard).
2. Whenever a construction site is within one-quarter (1/4) of a mile of an occupied residence or residences, no construction activities shall be undertaken between the hours of 6:00 p.m. and 6:00 a.m. during the months of June through September and between the hours of 6:00 p.m. and 7:00 a.m. during the months of October through May. Exceptions to these standards shall be allowed only with the written consent of the building official.
3. All construction vehicles, equipment fixed or mobile shall be equipped with properly operating and maintained mufflers, consistent with the manufactures' standard. The construction contractor shall place all stationary construction equipment so that emitted noise is directed away from the noise sensitive receptors nearest the project site.
4. During construction, best efforts should be made to locate stockpiling and/or vehicle staging area as far as practicable from existing noise sensitive receptors (residential dwellings) nearest the project site during all project construction.
5. A nine foot high noise barrier is to be constructed along the southeastern corner of the property project site. (see attached map & summary of recommendations)
6. Enclose the roof-top mechanical ventilation equipment or provide a 3 foot high parapet wall around all rooftop air for building "B" and "C" units. This wall should

**block the line-of-sight (view) from the backyard of the nearby homes to the exposed roof and ventilation systems.**

- 7. Restrict truck deliveries to the daytime hours of 7 a.m. to 10 p.m.**

**SUBJECT: GENERAL PLAN AMENDMENT NO. 895, CHANGE OF ZONE NO. 7755 AND CONDITIONAL USE PERMIT NO. 3663 – PROPOSED WOODCREST AREA COMMERCIAL SHOPPING CENTER WITH PHARMACY**

Dear Mr. Rull:

Thank you for the opportunity to comment on the above-noted project, a proposed General Plan Amendment, Change of Zone and Conditional Use Permit (CUP) on approximately three parcels totaling 1.95 gross acres located on the southeasterly corner of Van Buren Boulevard and Washington Street. The proposal would amend the County General Plan foundation component of the project site from Rural Community (RC) to Community Development (CD) and the County General Plan designation from Very Low Density Residential (VLDR) to Commercial Retail (CR), and change the zone from R-A-1 (Residential Agricultural) to C-P-S (Scenic Highway Commercial). Furthermore, a CUP is requested to remove several existing structures and construct three commercial retail buildings totaling 53,672 square feet, including a 17,272 square-foot Rite Aid pharmacy and 280 parking spaces. Although not in an active annexation area, the project area is located within the City's Sphere of Influence and is near the Riverside City limits.

On March 24, 2011, City of Riverside staff provided a comment letter to the Riverside County Planning Department in response to a case transmittal requesting comments on this project. On December 5, 2012, City staff received a second case transmittal for this project. After reviewing the latest transmittal and associated site plan and elevations, City staff stands by the following comment related to traffic:

- The Circulation and Community Mobility Element of the City's General Plan 2025 (Policy CCM-5.6), calls for the integration of signal systems with adjacent jurisdictions. Consistent with this policy, additional operational improvements need to be provided, such as Closed-Circuit Television Cameras (CCTV's) installed along Van Buren Boulevard at the intersections of Washington Street, Gamble Avenue and Chicago Avenue to further offset traffic impacts caused by the development. This is consistent with similar conditions applied to City and March JPA projects along Van Buren Boulevard.

City staff appreciates your collaboration on this project and looks forward to continue working alongside the County of Riverside and the project applicant. Please forward any updated plans or environmental documents, as they may pertain to this project, to the Planning Division for further review. Should you have any questions regarding this letter, please feel free to contact Gus Gonzalez, Associate Planner, at (951) 826-5277 or [ggonzalez@riversideca.gov](mailto:ggonzalez@riversideca.gov).

**SUBJECT: GENERAL PLAN AMENDMENT NO. 895, CHANGE OF ZONE NO. 7755  
AND CONDITIONAL USE PERMIT NO. 3663 – PROPOSED  
WOODCREST AREA COMMERCIAL SHOPPING CENTER WITH  
PHARMACY**

Dear Mr. Juarez:

Thank you for the opportunity to comment on the above-noted project, a proposed General Plan Amendment, Change of Zone and Conditional Use Permit (CUP) on approximately three parcels totaling 1.95 gross acres located on the southeasterly corner of Van Buren Boulevard and Washington Street. The proposal would amend the County General Plan foundation component of the project site from Rural Community (RC) to Community Development (CD) and the County General Plan designation from Very Low Density Residential (VLDR) to Commercial Retail (CR), and change the zone from R-A-1 (Residential Agricultural) to C-P-S (Scenic Highway Commercial). Furthermore, a CUP is requested to remove several existing structures and construct three commercial retail buildings totaling 53,672 square feet, including a 17,272 square-foot Rite Aid pharmacy and 280 parking spaces. Although not in an active annexation area, the project area is located within the potential Woodcrest Annexation Area (Area E) and is near the Riverside City limits. As such, City staff offers the following comments:

#### **Land Use**

Given that the project site is located within the City's sphere of influence, the City's General Plan (General Plan 2025) land use designation for the project site is C – Commercial. The project applicant proposes an amendment to the County General Plan designation from Very Low Density Residential (VLDR) to Commercial Retail (CR) for the project site, consistent with the City's General Plan land use designation. Therefore, retail use at this location is consistent with the City's General Plan 2025 Land Use Map and City staff generally supports a commercial use at this location.

## **Aesthetics/Design**

Per Item 4.1 of the Cities/County Memorandum of Understanding (MOU) adopted on March 12, 2002, the County was to adopt a policy setting forth development standards and implement such standards in city spheres of influence that provides for the County to have comparable development standards with cities. Prior to the adoption of the New County General Plan, the County was to establish agreeable development standards to apply in City spheres. Based on the intent of the MOU, the project site design, architecture and landscaping needs to be reviewed for consistency with the Riverside Zoning Code and the Citywide Design Guidelines and Sign Guidelines (CDGSG) to ensure development with a level of design comparable to development reviewed within the City. More specifically the following design related comment is provided:

- The proposed site plan shows approximately 10 feet of landscape setback along the Van Buren Boulevard and approximately 5 feet along Washington Street frontages. Landscape setbacks along Washington Street and Van Buren Boulevard need to be consistent with the City's Zoning Code landscape setback standard requiring a 15-foot wide landscape setback along all street frontages for developments with 21 or more parking spaces.
- In addition, Van Buren Boulevard is designated as a "Parkway" and "Scenic Boulevard" in the Master Plan of Roadways within the City's Circulation and Community Mobility Element of the General Plan 2025. As a Parkway and Scenic Boulevard, the landscaped setback area along Van Buren Boulevard needs to be consistent with General Plan 2025 Policy CCM-2.10 to "Emphasize the landscaping of Parkways and Boulevards." Consistency with this Policy can be ensured by providing the landscape setback area along Van Buren Boulevard per the City's Zoning Code requirement as mentioned above, along with the establishment of a high quality landscape design consistent with the Citywide Design and Sign Guidelines.

Please refer to the City of Riverside Zoning Code and the Citywide Design and Sign Guidelines at:

## **Traffic**

The Circulation and Community Mobility Element of the City's General Plan 2025 (Policy CCM-5.6), calls for the integration of signal systems with adjacent jurisdictions. Consistent with this policy, additional operational improvements need to be provided, such as Closed-Circuit Television Cameras (CCTV's) installed along Van Buren Boulevard at the intersections of Washington Street, Gamble Avenue and Chicago Avenue to further offset traffic impacts caused by the development. This is consistent with similar conditions applied to City and March JPA projects along Van Buren Boulevard.

City staff appreciates your collaboration on this project and looks forward to continue working alongside the County of Riverside and the project applicant. **Proposal: The revised CUP proposes to remove existing structures and construct three commercial retail structures**  
**APNs: 274-040-028; -029; -003**

Dear Mr. Rull:

The Riverside County Waste Management Department (Department) has reviewed the proposed project located north of Krameria Avenue, south of Van Buren Boulevard, and east of Washington Street, in the Lake Matthews/Woodcrest Area Plan. In order to mitigate the project's potential solid waste impacts and to help the County's efforts to comply with State law in diverting solid waste from landfill disposal, the Department is recommending that the following conditions be made a part of any Conditions of Approval for the project:

1. **Prior to issuance of a building permit for EACH BUILDING**, the applicant shall submit three (3) copies of a Recyclables Collection and Loading Area plot plan to the Riverside County Waste Management Department for review and approval. The plot plan shall conform to ***Design Guidelines for Recyclables Collection and Loading Areas***, provided by the Waste Management Department, and shall show the location of and access to the collection area for recyclable materials, along with its dimensions and construction detail, including elevation/façade, construction materials and signage. The plot plan shall clearly indicate how the trash and recycling enclosures shall be accessed by the hauler.
2. **Prior to final building inspection**, the applicant shall construct the recyclables collection and loading area in compliance with the Recyclables Collection and Loading Area plot plan, as approved and stamped by the Riverside County Waste Management Department.
3. **Prior to issuance of a building permit for EACH BUILDING**, A Waste Recycling Plan (WRP) shall be submitted to the Riverside County Waste Management Department for approval. At a minimum, the WRP must identify the materials (i.e., concrete, asphalt, wood, etc.) that will be generated by demolition, construction and development, the projected amounts, the measures/methods that will be taken to recycle, reuse, and/or reduce the amount of materials, the facilities and/or haulers that will be utilized, and the targeted recycling or reduction rate. During project construction, the project site shall have, at a minimum, two (2) bins: one for waste disposal and the other for the recycling of Construction and Demolition (C&D) materials. Additional bins are encouraged to be used for further source separation of C&D recyclable materials. Accurate record keeping (receipts) for recycling of C&D recyclable materials and solid waste disposal must be kept. Arrangements can be made through the franchise hauler.

4. **Prior to issuance of an occupancy permit for EACH BUILDING**, evidence (i.e., receipts or other type of verification) to demonstrate project compliance with the approved WRP shall be presented by the project proponent to the Planning Division of the Riverside County Waste Management Department in order to clear the project for occupancy permits. Receipts must clearly identify the amount of waste disposed and Construction and Demolition (C&D) materials recycled.
5. Hazardous materials are not accepted at Riverside County landfills. In compliance with federal, state, and local regulations and ordinances, any hazardous waste generated in association with the project shall be disposed of at a permitted Hazardous Waste disposal facility. Hazardous waste materials include, but are not limited to, paint, batteries, oil, asbestos, and solvents. For further information regarding the determination, transport, and disposal of hazardous waste, please contact the Riverside County Department of Environmental Health, Environmental Protection and Oversight Division, at 1.888.722.4234.
6. Use mulch and/or compost in the development and maintenance of landscaped areas within the project boundaries. Recycle green waste through either onsite composting of grass, i.e., leaving the grass clippings on the lawn, or sending separated green waste to a composting facility.
7. Consider xeriscaping and using drought tolerant/low maintenance vegetation in all landscaped areas of the project.

Thank you for the opportunity to review this proposal. If you have any questions, please call me at (951) 486-3200.

RE: General Plan Amendment No. 895, Change of Zone No. 7755 and Conditional Use Permit No. 3663

Dear Mr. Juarez:

Thank you for the opportunity for Riverside Transit Agency (RTA) to review the proposed shopping center on the southeast corner of Van Buren Boulevard and Washington Street. RTA currently provides service along the north side of the proposed project site.

Considering the likelihood of this being a destination for many transit riders, it is recommended that the current site plans be remain. The site plans indicate that a turnout will be placed on the far side of the intersection (See Exhibit A for details on bus stop placement). Far side stops are usually preferred as they are less likely to encounter car traffic conflicts.

For more information on bus stop designation, please see RTA's *Design Guidelines for Bus Transit* document at <http://www.riversidetransit.com/about/guidelines.htm>.

Please do not hesitate to contact me with any questions by phone at (951)565-5130 or email at [mstanley@riversidetransit.com](mailto:mstanley@riversidetransit.com).
