Summary

Board of Supervisors' Policy B-4 directs those departments that have the ability to generate revenue from fees shall do so. FORM 11: Fee Revisions within the Environmental Health Service Fee Provisions of Riverside
County Ordinance 640. All Districts; [\$0]**

DATE: May 30, 2014

PAGE: 2 of 4

BACKGROUND:

Summary (continued)

Environmental Health last adjusted rates in FY 2008-09. Since that time expenditures have increased 4.55% and revenues increased 2.38%. Environmental Health has been able to maintain service levels during these years through leveraging grant funds, mandatory furloughs and conservative spending. Historically, Environmental Health has experienced cost increases on average of 5.3% per year.

In FY 2008-09 Environmental Health received \$689,691 in general fund support, down from a high of \$1.1 million in FY 1989-90, for vector control activities and hazardous material emergency responses. This general fund support has continued to dwindle over the years to \$249,875 in FY 2013-14 and, in FY 2014-15, Environmental Health will no longer receive general fund support.

In FY 2014-15 Environmental Health will experience cost increases totaling approximately \$1.2 million. Most notable is a 3.99% increase in salaries and benefits, a 751.68% increase in COWCAP, a 4.94% increase RCIT charges, and \$249,875 in eliminated general fund support. These increases, coupled with past expenditures out pacing revenues, require Environmental Health to adjust fees. Therefore, to generate sufficient revenue to support the mandated activities Environmental Health performs, the department is requesting an average fee increase of 6.2%. It is anticipated that the fee adjustments will generate approximately \$1.2 million. While most fees will increase, a number of fees will remain unchanged and some will be reduced due to factors such as changes in mandated inspection frequencies. The fees that have been adjusted are delineated in Attachment 3.

Additionally, the revised Ordinance 640 provides for a 9% increase in FY 2015-16. This fee adjustment will allow Environmental Health to address anticipated cost increases in FY 2015-16 such as increased salary and benefits, additional staff to meet increased facility inspections, internal county support costs and other operating costs.

A final version (Attachment 1) of the ordinance, a strike-out version (Attachment 2) of the ordinance showing changes and a comparison chart of current and proposed fees (Attachment 3) are attached for your review.

Environmental Health submitted its FY 2014-15 budget request, as directed, on March 13, 2014 to the Executive Office. Subsequent to that date Environmental Health was informed by the Executive Office it would no longer receive general fund support effective the beginning of FY 2014-15, and to make allowances for the loss in the rate adjustment analysis. The requested budget adjustments, as detailed in Schedule A, will correct Environmental Health's FY 2014-15 budget request to reflect the loss of general fund support and changes in revenue due to the rate adjustments. In addition, the budget adjustments address the additional step and merit increases for staff in FY 2014-15.

A summary of changes to the text of the Ordinance are as follows:

Food Facilities

The food facility category has been further defined to allow for greater flexibility in identifying rate adjustments.

The new category of Community Artisan Operation permit is for food operators who work in an existing, permitted food facility and offer only limited foods, unlike a full catering operation.

A new plan check fee of \$700 has been added to cover those instances where multiple minor remodeling of various areas within an existing facility occurs; this allows for a lower fee to be charged to the business.

The mobile food facility truck/trailer categories have been added for the plan check and permit fees as defined in Ordinance 580.

Penalties

Currently Ordinance 640 requires that Environmental Health collect penalties regardless of any extenuating circumstances. In keeping with the County's goal of being business friendly, the revised ordinance would allow management to reduce or waive penalties on a case by case basis. A department policy has been developed that details the eligibility and procedures of granting reductions and waivers.

Annual Fee Adjustments

Language is added to allow for automatic fee adjustments annually effective July 1, 2016. Fee adjustment may be adjusted annually up to the Consumer Price Index. The Ordinance will require Environmental Health to report to the Board of Supervisors no later than April 15 of each year on any fee adjustments.

Impact on Residents and Businesses

Businesses will be impacted by increased fees for food facility permits, public pool permits and plan checks, body art permits, solid waste and hazardous material related activities, septic tank permits and water well permits.
