BACKGROUND:

Summary (continued)

Mosby System will replace multiple existing programs identified by the consultants as no longer meeting the needs of the Medical Center. Mosby's Suite provides the most comprehensive resources available in the market place to enhance patient care by using up to date evidence base resources for nursing and allied health professional staff.

In addition to the patient care and staff education, Mosby's Suite offers the following additional resources.

- Searches over 3,000 journal titles and provides access to over 12,000 patient handouts from Exit Care
- Provides practice guidelines from 450 authoring organizations, these guidelines are updated on a regular basis. This resource will give access to the information without waiting for a book or a journal to be published.
- Joint Commission Core Measures and case studies. This resource will facilitate the readiness of clinical staff for regulating body certifications.
- Medication Safety Section. 50+ full text nursing books. Care Plans. CMS Never Events
- Offers over 100 CEUs available to every nurse every year. This would be a great benefit to staff in keeping up to date for licensure.
- Drug database from Gold Standard and Medication safety section, this tool would provide excellent patient teaching resources.
- Core Measures with case studies. Quality and Safety Section
- 1,300 skills and procedures that include the ability to assign, test, track and customize.
- Includes Advanced Practice and Respiratory Care Skills. Patient Education from ExitCare. 1,500 images, these images could be used across all disciplines for educational presentations at RCRMC
- Endorsed by the American association of Critical Care Nurses, Association of peri-Operative Registered Nurses, Association of Women's Health, Obstetric and Neonatal Nurses, and American Society for Parenteral and Enteral Nutrition.

Impact on Residents and Businesses

This service impacts the patients who receive care from RCRMC and may result in decreased Length-of-Stay, higher patient satisfaction, and cost savings to the tax payers of Riverside County.

Contract History and Price Reasonableness

There is no other product available on the current market which matches the comprehensiveness of Mosby's Suite. Mosby's Suite will replace current software: Krames exit writer (ED discharge instructions), Krames Staywell (discharge instruction for inpatient/outpatient services), EBSCO (Journal library and resources) and miscellaneous text resources. Nursing Administration and Purchasing have vigorously negotiated the pricing and the agreement includes a favored customer clause which indicates that the company has offered no better terms and benefits to any previous buyer.

Subject: Sole Source Procurement; Request for (Mosby's Suite) Nursing and allied professional evidence based procedure/resources.

The below information is provided in support of my Department requesting approval for a sole source. Outside of a duly declared emergency, the time to develop a statement of work or specifications is not in itself justification for sole source.

1. Supply/Service being requested:

An electronic evidence based, up to date resource for procedures and patient and staff education .

2. Supplier being requested:

Mosby's Suite. (Elsevier /MC Strategies parent company)

3. Alternative suppliers that can or might be able to provide supply/service:

Krames and EBSCO, other provider's information is not as comprehensive as Mosby's Suite.

4. Extent of market search conducted:

EBSCO/CINAHL, Krames, Ovid have all been reviewed or previously utilized.

5. Unique features of the supply/service being requested from this supplier, which no alternative supplier can provide:

This provider gives the most comprehensive resources for nursing and some additional allied health resources. It will replace the current subscriptions with EBSCO, Krames, and other printed resources used for patient and nursing education. It will also be used as a patient procedures resource.

6. Reasons why my department requires these unique features and what benefit will accrue to the county:

The evidence based practice resources for patient and staff education to provide the best service to the residents of Riverside County needing health care.

7. Price Reasonableness including purchase price and any ongoing maintenance or ancillary costs from the supplier:

The sole source of Mosby's Suite will replace the existing resources of Krames and EBSCO/CINAHL and other printed resources for nursing procedures as well as resources for respiratory care practioners. Mosby's Suite will replace existing resources, electronic and printed which are equivalent to a minimum of \$54,508.14 annually.

8. Does moving forward on this product or service further obligate the county to future similar contractual arrangements or any ongoing costs affiliated with this sole source? (Maintenance, support, or upgrades, if so, please explain).

The three year contract has an escalating cost approximately \$2,500.00 annually.

9. Period of Performance:

The contract for the Mosby's Nursing Suite is a three year contract.
