BACKGROUND:

Summary (continued)

Nationwide, School Districts have been incorporated into the Strategic National Stockpile (SNS)/Cities Readiness Initiative (CRI) plans to be used as MPS. Dependent on the scope and breadth of the emergency, the School District facilities are optional locations for MPS to provide medications or vaccinations to the public, and for ACS to provide additional outpatient healthcare when the local healthcare system is overwhelmed.

The School District sites can be reasonably recurred; and designed to managed the flow of large numbers of people; have ample parking; contain extensive space; can accommodate mass food preparation; have multiple restroom facilities; and are located in every community.

The DOPH is aware that the School Districts have an MOU with the American Red Cross for temporary shelters. The likelihood of all three function (Red Cross Temporary Shelter, MPS or ACS) operating in a public health emergency is somewhat low. However, in every case, the situation will be assessed and the greater public need will determine the use of the School District facilities.

Impact on Citizens and Businesses

Establishing these MOUs with Riverside County School Districts will allow DOPH to reach and assist Riverside County residents quickly during public health emergencies.

Contract History and Price Reasonableness

On October 16, 2007, agenda Item 3-6, the Board of Supervisors approved a previous 5-year agreement with the School Districts for the use of their facilities as a MPS or ACS.
