BACKGROUND:

Summary (continued)

The FEIR identified "Proposed Phase I Facilities" (Approved Project) that were expected to be constructed over the next few years. Since that time, final design was completed and regulatory permit authorizations were obtained by a private corporation for the construction of Approved Project. Except for some interim excavation, the construction of the Approved Project by the private corporation was delayed and will now be constructed by the District. The Project consists of the construction, operation and maintenance of the following facilities which were included in the Approved Project: Romoland MDP Line A, Romoland MDP Line A-2, Romoland MDP Line A-3, Homeland MDP Briggs Road Basin, Homeland MDP Line 1, and Homeland MDP Juniper Flats Basin. The Project will begin just upstream of I-215 and terminate northeast of the intersection of Juniper Flats Road and Falcon View Lane. The Project length is approximately 41,000 lineal feet and consists of open channels, underground reinforced concrete boxes/reinforced concrete pipes and two (2) basins. The Project will convey runoff from the hills northeast of Romoland and flows emanating from the Homeland area starting upstream in the vicinity of the Juniper Flats area. It will also provide an outlet to such storm runoff. Staff is recommending the approval of Resolution No. F2014-29

Impact on Residents and Businesses

The proposed Project will protect residents, property and the watershed from damage or destruction from flood and stormwater impacts. There is a residential tenant which will be relocated pursuant to the Uniform Relocation and Property Acquisition Act of 1970, as amended.
