BACKGROUND:

Summary

The County Transportation Improvement Program provides for the resurfacing of a two-mile segment of 62nd Avenue, from Jackson Street to Harrison Street, in the Community of Vista Santa Rosa of the Coachella Valley.

62nd Avenue is currently a rural, two-lane facility that travels in the east-west directions. The total pavement width is approximately 24-feet wide.

The road is classified as Rural Collector, with some truck traffic from local farms and businesses in the area. Various sections of road within this two-mile segment of 62nd Avenue have moderate damage with some alligator cracking and block cracking, which is normally caused by heavy wheel loads and thermal effects, and are in need of repair.

The purpose of this project is to resurface these two miles of the road to provide the public with a smooth paved roadway that will improve the safety and efficiency of vehicular traffic.

The planned improvements include grinding existing pavement in place and placing 0.4-feet of new hot mix asphalt. Shoulder backing material will be placed to protect the outside edge of pavement, prevent edge cracking, and pavement edge deterioration. Safety improvement items include striping, reflective pavement markers, and the construction of a pavement "safety edge." The "safety edge" is engineered to enable drivers who drift off of the paved surface to return to the traveled surface safely.

The plans and specifications have been approved as to form by County Counsel, and environmental clearance is complete.

Project Number: C1-0599, Federal Aid No. STPL-5956(232)

Impact on Residents and Businesses

The proposed improvements will benefit the project area by significantly improving the existing infrastructure, preserving and extending the service life, as well as providing upgrades to enhance safety.

The work is scheduled to begin in late 2014. The work will be phased to keep the roads open during construction and will take approximately five weeks to complete.

SUPPLEMENTAL:

Additional Fiscal Information

The construction contract is estimated to cost approximately \$832,000; construction is expected to finish in FY 2014/2015 and will be funded with Gas Tax (ABX8-9 Mar 2010 New Huta) and STP-Formula (Urban/Urban Place) funds.

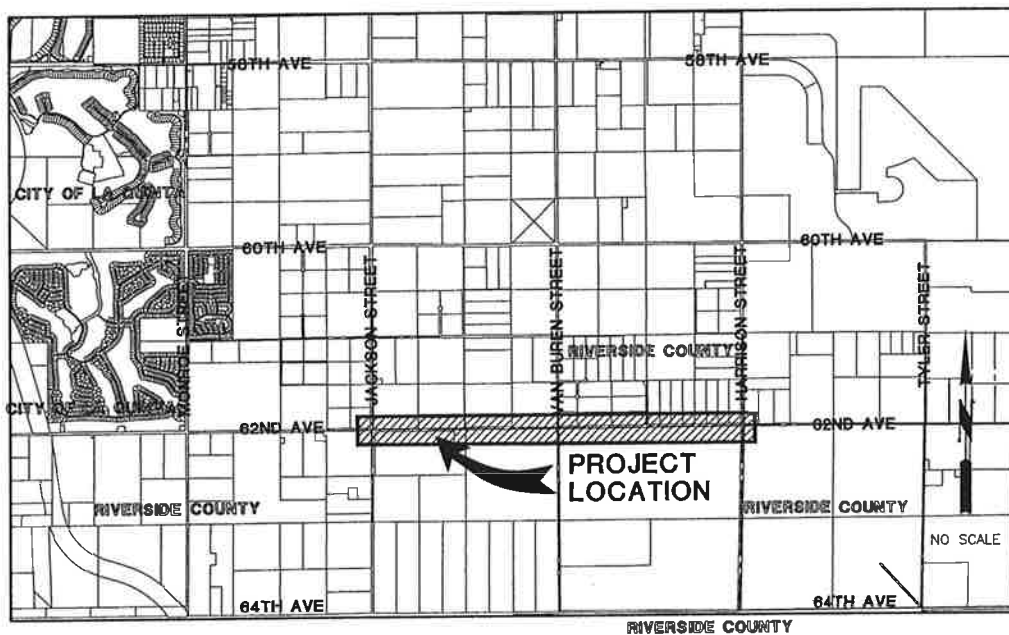

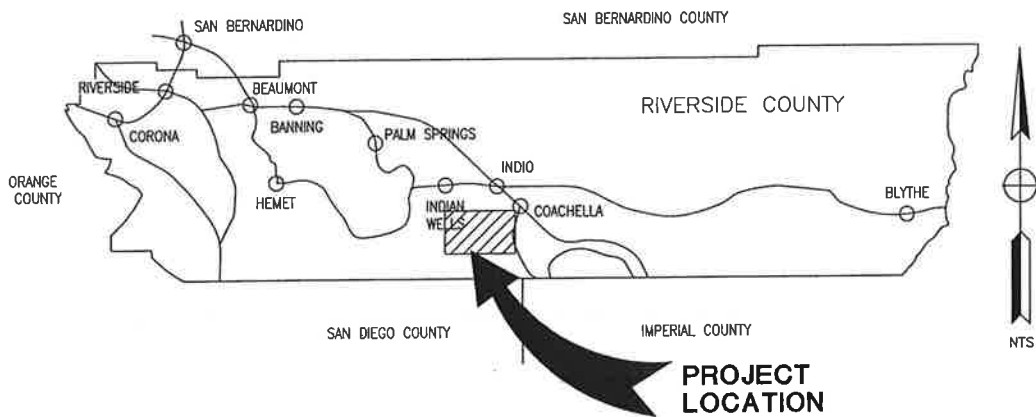

There are no General Funds used in this project.
