1. Facility-related noise, as projected to any portion of any surrounding property containing a "sensitive receiver, habitable dwelling, hospital, school, library, or nursing home", must not exceed the following worst-case noise levels: 45 dB(A) - 10 minute noise equivalent level ("leq"), between the hours of 10:00 p.m. to 7:00 a.m. (nighttime standard) and 65 dB(A) - 10 minute leq, between 7:00 a.m. and 10:00 p.m. (daytime standard).

Whenever a construction site is within one-quarter (1/4) of a mile of an occupied residence or residences, no construction activities shall be undertaken between the hours of 6:00 p.m. and 6:00 a.m. during the months of June through September and between the hours of 6:00 p.m. and 7:00 a.m. during the months of October through May. Exception to these standards shall be allowed only with the written consent of the building official.

3. All construction vehicles, equipment fixed or mobile shall be equipped with properly operating and maintained mufflers, consistent with the manufacturer's standard. The construction contractor shall place all stationary construction equipment so that emitted noise is directed away from the noise sensitive receptors nearest to the project site.

4. During construction, best efforts should be made to locate stockpiling and/or vehicle staging area as far as practicable from existing noise sensitive receptors (residential dwellings) nearest the project site during all project construction.

FLOOD RI DEPARTMENT

10.FLOOD RI. 1

USE FLOOD HAZARD REPORT

RECOMMND

Public Use Permit 00921 is a proposal to connect underground power lines from a proposed equipment skid to the existing Southern California Edison electrical transmission lines. The approximately 10-acre site is located in the Winchester area on the south side of Grand Avenue east of Patterson Avenue. The south property line is adjacent to the AT&SF Railroad right of way. Parcel Map 36611, Conditional Use Permit 3698 and Change of Zone 7813 are being processed concurrently with this proposal. The site is Parcel 4 of PM 36611.

CUP 3698 is a proposal to construct an unmanned solar photovoltaic electricity generation facility, along with an equipment skid and other associated equipment, on this site. PUP 921 is necessary because a portion of the cables transmitting power from the equipment skid to the offsite transmission lines will be crossing the Grand Avenue road rights of way.

The site is subject to sheet flow flooding and the cables should be buried underground sufficiently to be protected from flows and scour. Blockage of flows due to the installation of any utility poles should be minimal. However, a storm of unusual magnitude could cause some damage.

The project site is located in the Winchester/North Hemet sub-watershed of the Salt Creek Channel Area Drainage Plan (ADP) where fees have been adopted by the Board of Supervisors. However, the amount of new impervious surface is negligible and therefore the District shall not impose any fee at this time. Should additional development or use be proposed, the mitigation fee may be levied at that time.

The District does not object to this proposal.

RECOMMND

Pursuant to Objective 6 and Objective 7 of the Species Account for the Burrowing Owl included in the Western Riverside County Multiple Species Habitat Conservation Plan, within 30 days prior to the issuance of a grading permit, a pre-construction presence/absence survey for the burrowing owl shall be conducted by a qualified biologist and the results of this presence/absence survey shall be provided in writing to the Environmental Programs Department. If it is determined that the project site is occupied by the Burrowing Owl, take of "active" nests shall be avoided pursuant to the MSHCP and the Migratory Bird Treaty Act. However, when the Burrowing Owl is present, relocation outside of the nesting season (March 1 through August 31) by a qualified biologist shall be required. The County Biologist shall be consulted to determine appropriate type of relocation (active or passive) and translocation sites. Occupation of this species on the project site may result in the need to revise grading plans so that take of "active" nests is avoided or alternatively, a grading permit may be issued once the species has been actively relocated.

If the grading permit is not obtained within 30 days of the survey a new survey shall be required.

The preconstruction nesting bird survey must be conducted by a biologist who holds a current MOU with the County of Riverside. Surveys shall cover all potential nesting habitat areas that could be disturbed by each phase of construction. Surveys shall also include areas within 500 feet of the boundaries of the active construction areas. The biologist shall prepare and submit a report, documenting the results of the survey, to the Environmental Programs Division (EPD) of the Riverside County Planning Department for review and approval. 60.EPD. 1 EPD - 30 DAY BURROWING OWL SUR RECOMMND

Pursuant to Objective 6 and Objective 7 of the Species Account for the Burrowing Owl included in the Western Riverside County Multiple Species Habitat Conservation Plan, within 30 days prior to the issuance of a grading permit, a pre-construction presence/absence survey for the burrowing owl shall be conducted by a qualified biologist and the results of this presence/absence survey shall be provided in writing to the Environmental Programs Department. If it is determined that the project site is occupied by the Burrowing Owl, take of "active" nests shall be avoided pursuant to the MSHCP and the Migratory Bird Treaty Act. However, when the Burrowing Owl is present, relocation outside of the nesting season (March 1 through August 31) by a qualified biologist shall be required. The County Biologist shall be consulted to determine appropriate type of relocation (active or passive) and translocation sites. Occupation of this species on the project site may result in the need to revise grading plans so that take of "active" nests is avoided or alternatively, a grading permit may be issued once the species has been actively relocated.

If the grading permit is not obtained within 30 days of the survey a new survey shall be required.

60.EPD. 2 EPD-MBTA SURVEY RECOMMND

Birds and their nests are protected by the Migratory Bird Treaty Act (MBTA) and California Department of Fish and Game (CDFG) Codes. Since the project supports suitable nesting bird habitat, removal of vegetation or any other potential nesting bird habitat disturbances shall be conducted outside of the avian nesting season (February 1st through August 31st). If habitat must be cleared during the nesting season, a preconstruction nesting bird survey

Surveys shall also include areas within 500 feet of the boundaries of the active construction areas. The biologist shall prepare and submit a report, documenting the results of the survey, to the Environmental Programs Division (EPD) of the Riverside County Planning Department for review and approval. If nesting activity is observed, appropriate avoidance measures shall be adopted to avoid any potential impacts to nesting birds.
