Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Potential Media Affect: Aquifer used for drinking water supply
 Potential Contaminants of Concern: Gasoline
 Site History: In November 2002, during dispenser and piping upgrades, petroleum hydrocarbon impacted soil was discovered at depths up to 2 feet bgs. Nine soil samples were collected from beneath the dispensers and product piping. Gasoline range organics (GRO) were reported in two samples at concentrations of ppm at D3B-2 and 730 ppm at PI-2. One or more of the compounds, toluene, ethylbenzene, and xylenes were reported in samples PI-2, D2F-2, D3A-2, and D3B-2. Methyl tert-butyl ether (MTBE) was reported in seven of the nine soil samples at concentrations ranging from 0.00094 ppm to 0.12 ppm and tert-butyl alcohol (TBA) was reported in three samples ranging from 0.026 ppm to 2.7 ppm. Based on the soil sample results, an unauthorized release report was filed. On August 18, 2009, three borings were drilled. Refusal was encountered in all three borings due to difficult drilling conditions in borings MW-1, MW-2 and MW-3, at depths of 43 feet, 36 feet and 17 feet below ground surface (bgs), respectively.

Groundwater was encountered in MW-1 at a depth of 39 feet bgs and a monitoring well was installed and screened from 22.5 to 42.5 feet bgs. On September 21 and 22, 2009, wells MW-2 and MW-3 were advanced to 51 feet bgs, and screened from 30 to 50 feet bgs. The vertical extent of hydrocarbon-impacted soil has not been defined in the dispenser area. No significant impact to the groundwater has been identified in three existing wells, however, none of the wells are located downgradient of the source area (D3A-2/D3B-2). Shallow soils consist of interbedded silty sand and sandy silt to approximately 20 feet bgs, which underlain with granitic bedrock.

Description:

The U.S. acquired a total of 713.665 acres of land in fee and direct purchase for the former Corona Naval Hospital, located in the city of Norco, Riverside County, California. The site is located about 3 miles north of the City of Corona, in Norco, Riverside County, California. The site entrance is located on Fifth Street south of Norconian Drive. The site is bounded by Fifth Street to the north, Hamner Avenue to the east, Third Street to the south, and Western Avenue to the west. Disestablishment of the hospital was declared by the Navy on 1 November 1949. The hospital was reopened on 1 June 1951 and the Navy inactivated the hospital again in September 1957. On 21 September 1959, 580 acres of the former hospital site were transferred to Bureau of Naval Weapons for use by the Naval Ordnance Laboratory. The remaining 115 acres were declared excess and recommended to GSA for disposal.) On 30 March 1962, 92.3553 acres were transferred to the State of California for use as a Narcotics Rehabilitation Center. On 15 May 1962, an additional 14.6014 acres were transferred to Corona Unified School District. On 4 June 1985, 141.86 acres were transferred to Riverside Community College District. Approximately 219 acres were transferred by quitclaim deeds to two private owners on 19 May 1967 and 23 June 1972. These parcels were subsequently purchased by two housing developers. The Seal Beach Naval Weapons Station currently owns 245.75 acres.

The site is a former Navy site for testing and targeting activities. Beginning in December 1941, the U.S. acquired a total of 713.665 acres of land in fee and direct purchase for the former Corona Naval Hospital. In 1959, the entire site was transferred to the Bureau of Naval Weapons. Subsequently, portions of the site totaling 467.915 acres were declared excess, and selected parcels of the site were relinquished and transferred through several quitclaim deeds at various time periods to private developers and the State of California. The Navy currently occupies 245.75 acres. Disposals occurred as follows: On 30 March 1962, 92.3553 acres were transferred to the State of California for use as a Narcotics Rehabilitation Center. On 15 May, 1962, 14.604 acres were transferred to Corona

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.
