**BACKGROUND:**

**Summary (continued)**

Each year the Water Education Foundation organizes conferences and tours so local leaders and community members can learn about water firsthand from experts on all sides of the issue. The tours are action-packed field trips that offer participants a firsthand look at the water facilities, rivers and regions critical in the debate about the future of water resources. Issues of water supply, water quality, environmental restoration, groundwater, flood management, and water conservation are addressed by a wide-range of speakers representing different viewpoints.

The District is a partner with the Water Education Foundation to promote education of water conservation practices. The District's award-winning Low Impact Development project will be one of the featured stops on the tour.
