Summary (continued)

Medical Services (EMS) System. A Base Hospital is one of a limited number of hospitals which, upon designation by the Riverside County Emergency Medical Services Agency (REMSA) and upon completion of a written contractual agreement, is responsible for medical direction and supervision of the advanced life support system or limited advanced life support system and pre-hospital system assigned to it by REMSA.

These agreements for medical direction have been in place since 2005, and were most recently renewed in 2013 (Item 3.46, September 24, 2013). They are required under California Health and Safety Code Sections 1797.58 and 1798.100 thru 1798.105, and California Code of Regulations, Division 9, Title 22, Chapter 4, Section 100169. Late submission of these agreements is due to processing delays in coordinating with the hospitals.

In addition to the five hospitals represented by these agreements, Riverside County Regional Medical Center also serves as a Base Hospital. A Memorandum of Understanding with Riverside County Regional Medical Center for Base Hospital services will be signed by the Director of Emergency Management.

These are no money agreements.

Impact on Residents and Businesses

There are no negative impacts on residents and businesses of Riverside County. These agreements provide for appropriate, timely and accurate treatment of emergency medical conditions in the field and direction to appropriate levels of care for all residents and visitors.
