BACKGROUND:

Summary (continued)

The General Manager-Chief Engineer authorized this emergency repair work and request for quotation was sent out to four selected construction companies on October 20, 2015. On November 5, 2015 the District received quotations from all four companies. This emergency repair project is located just below the intersection of Limonite Avenue and Baine Street in the city of Jurupa Valley. In 1987 the District built a concrete encased sheet pile wall at the downstream end of the San Sevaine Channel Outlet. Due to high channel velocities this concrete encased sheet pile wall lost its rock support. The District has been monitoring this structure and analyzing remediation options. The best course of action is to replace the rock and grout the voids to stabilize the wall. This emergency repair work is to provide the necessary support to the sheet pile wall before the next rainy season.

Summary (continued)

The General Manager-Chief Engineer authorized this emergency repair work and request for quotation was sent out to four selected construction companies on October 20, 2015. On November 5, 2015 the District received quotations from all four companies. This emergency repair project is located just below the intersection of Limonite Avenue and Baine Street in the city of Jurupa Valley. In 1987 the District built a concrete encased sheet pile wall at the downstream end of the San Sevaine Channel Outlet. Due to high channel velocities this concrete encased sheet pile wall lost its rock support. The District has been monitoring this structure and analyzing remediation options. The best course of action is to replace the rock and grout the voids to stabilize the wall. This emergency repair work is to provide the necessary support to the sheet pile wall before the next rainy season.
