BACKGROUND:

Summary

On April 27, 2015, the Board awarded Yellow Jacket Drilling the contract for the construction and abandonment of groundwater monitoring wells at the Badlands Sanitary Landfill, Closed Mead Valley Sanitary Landfill and Closed Elsinore Sanitary Landfill. On August 17, 2015, the construction project was satisfactorily completed. The final cost for the construction project was \$131,325, approximately 9 percent more than the original contract amount. The additional \$11,300, over the original contract amount, was a result of unknown subsurface field conditions, which were revealed during the project. The contract amount was increased under the General Manager-Chief Engineer's authority, in accordance with the Contract Documents.

Impact on Citizens and Businesses

The construction project ensures that the subject landfills maintain compliance with environmental regulations enforced by the California Regional Water Quality Control Board – Santa Ana Region.

SUPPLEMENTAL:

Contract History and Price Reasonableness

Two bids were received for this project ranging from \$121,025 to \$141,107. The basis for the selection of the contractor for this project was the lowest responsive and responsible bid. The lowest responsible bid was submitted by Yellow Jacket Drilling in the amount of \$121,025, which was \$20,082 lower than the other responding bidder. Increased project costs due to unforeseen field conditions increased the project cost to \$131,325, which is \$9,782 lower than the other responding bidder.

This is an administrative action to file the Notice of Completion. No additional funds are being requested.
