RECOMMND

June 03, 2015 and accepted by the County Archaeologist on June 22, 2015.

PDA04907 concludes: No previously undocumented cultural resources were identified.

PDA04907 recommends: The proximity of cultural resources indicates a high sensitivity for subsurface archaeological resources. Therefore, monitoring of all earth-disturbing activity within the project is recommended.

These documents are herein incorporated as a part of the record for project.

USE - GEO02438

RECOMMND

County Geologic Report GEO No. 2438, submitted for the project Tract Map (TR36894) was prepared by Soil Exploration Company, Inc. entitled; "Response to Riverside County Review (GEO 2438), Preliminary Geotechnical Feasibility Investigation and Infiltration Test Report, Proposed 21 Lot Single Family Residential Development, Praed Street (SEC of Dufferin Avenue and Praed Street, Riverside County, California" dated November 3, 2015. In addition, Soil Exploration Company, Inc. provided the following additional reports:
Preliminary Geotechnical Feasibility Investigation and Infiltration Test Report, Proposed 21 Lot Single Family Residential Development, Praed Street (SEC of Dufferin Avenue and Praed Street, Riverside County, California, dated December 22, 2014

GEO02438 concluded:

1. Based on our review of geologic maps, aerial photo analysis, and field mapping, there is no evidence of faulting existing on or trending toward the subject property. The potential for ground rupture along a pre-existing fault is considered very low.
2. Depth to historically highest groundwater is estimated to be at a depth of 7 feet below the ground surface (at Elev. 933 msl).
3. The northeast portion of the site has been identified as susceptible to liquefaction based on relatively loose sediment and shallow groundwater, and mitigation measures will be required for all construction in the alluvial area.

10.PLANNING. 19

USE - GEO02438 (cont.)

RECOMMND

4.The site is located below the Lake Mathews dam and the site may be subject to dam inundation in the unlikely event of dam failure during a seismic event.

GEO02438 Recommended:

1.To mitigate the potential adverse effects of liquefaction hazard we recommend a combination of soil improvements and foundation modifications in the area of Lots 1, 2, and 12 through 16.

2.Soil improvements should consist of the complete removal and re-compaction of the young alluvial sediment, which is considered to be susceptible to settlement and lateral spreading during a seismic event.

3.De-watering and possibly specialized heavy duty earth moving equipment will be required to facilitate removal of loose sediment below the groundwater elevation.

4.Foundation modification should include post tensioned slab systems for the subject Lots 1, 2, and 12 through 16 at a minimum.

GEO No. 2438 satisfies the requirement for a geologic/geotechnical study for Planning/CEQA purposes. GEO No. 2438 is hereby accepted for Planning purposes.

Engineering and other Building Code parameters were not included as a part of this review or approval. This approval is not intended and should not be misconstrued as approval for grading permit. Engineering and other building code parameters should be review and additional comments and/or conditions may be imposed by the County upon application for grading and /or building permits.

NOTE: The preliminary geotechnical study for the project contains no laboratory analyses of shear strength, hydroconsolidation, expansion potential, or grain size distribution; therefore, soil strength and other soil characteristics are not well known on the site. As such, prior to grading permit issuance, additional design-specific analysis should be performed, and consideration should be given to utilizing geotextile fabrics as a weak soil mitigative measure within areas susceptible to liquefaction.

2) Provide mechanical ventilation, such as an air-conditioning system, to all residential units.

Construction noise mitigation:

i) During all project site excavation and grading, the construction contractor shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers consistent with manufacturers' standards.

ii) The construction contractor shall place all stationary construction equipment so that emitted noise is directed away from sensitive receptors nearest the project site.

iii) The contractor shall locate equipment staging in areas that will create the greatest distance between construction-related noise sources and sensitive receptors nearest the project site during all project construction.

3. The standard residential design with windows closed provides a 20 dB, A-weighted (reduction inside) attenuation.
4. Traffic Speed of 40 MPH.
5. Barrier calculations based on receptor at 10 feet from the barrier and at a 5 foot elevation.
6. Interior calculations based on receptor at a 5-foot elevation inside the dwelling in the room nearest the noise source and 14 feet above the pad for the second floor in the middle of the room nearest the noise source.

Findings:

The consultant's report is adequate. We concur with the findings and recommendations.

Recommendations:

The following conditions shall be applied to the project based on the information provided by the consultant:

- **Exterior noise mitigation – 6 foot high sound wall / barrier:**

- 1) A six (6) foot high noise barrier / sound wall shall be constructed along the southwestern property line along Praed Streets shielding Lots 1 through 8.
- 2) A six (6) foot high noise barrier / sound wall shall be constructed along the western property line along Dufferin Avenue shielding Lot #1.

The barrier must be constructed with a top elevation that is six feet higher than the adjacent elevation of the roadway.

- **Interior noise mitigation – architectural consideration:**

- 1) **Lots 1 through 8:** Provide double-paned windows with a minimum sound transmission class (STC) of 30 for second-floor bedrooms and living rooms facing Praed Street.
- 2) Provide mechanical ventilation, such as an air-conditioning system, to all residential units.

- **Construction noise mitigation:**

- i) During all project site excavation and grading, the construction contractor shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers consistent with manufacturers' standards.
- ii) The construction contractor shall place all stationary construction equipment so that emitted noise is directed away from sensitive receptors nearest the project site.
- iii) The contractor shall locate equipment staging in areas that will create the greatest distance between construction-related noise sources and sensitive receptors nearest the project site during all project construction.
- iv) The contractor shall limit construction to between the hours of 6:00 a.m. and 6:00 p.m. during the months of June through September and between the hours of 7:00 a.m. and 6:00 p.m. during the months of October through May.

Subject: Land Development Committee Initial Case Transmittal for Change of Zone No. 7867 & Tentative Tract Map No. 36894

Dear Ms. Abraham:

Thank you for the opportunity to comment on the above-noted project - a Change of Zone and Tentative Tract Map for Schedule A subdivision of 14 acres into 22 residential lots, and two open space lots. The project site is located in the Southeasterly corner of McAllister Parkway, east of Praed Street and west of Hillsmont Lane in the City of Riverside's southern sphere of influence and within a potential City annexation area (Lake Hills/Victoria Gardens/The Orchards Annexation area). The project site is also located immediately south of the City limits and the City's historic Arlington Greenbelt, an area subject to voter initiatives Proposition R and Measure C. These measures are intended to preserve Riverside's citrus and agricultural lands, scenic hills, ridgelines, arroyos and wildlife areas. City of Riverside staff has reviewed the proposed subdivision and offers the following comments:

General Plan Land Use Consistency - The proposed Change of Zone from Residential Agricultural (R-A) to One Family Dwelling—15,000 Sq. Ft. Minimum (R-1-15000) and Open Area Combining Zone-Residential Developments (R-5), allowing for the proposed subdivision, is inconsistent with the City's HR - Hillside Residential General Plan 2025 land use designation for the site. The City's Hillside Residential (HR) land use designation is intended to limit development of Riverside's ecologically sensitive and visually prominent hillside areas. This designation has been applied to most hillside areas where slopes exceed fifteen percent and allows a maximum residential intensity of 0.5 dwelling units per acre (0.63 dwelling units per acre with a Planned Residential Development (PRD) Permit).

The County's General Plan land use designation for the site is Lake Mathews/Woodcrest Area Plan - Community Development: Low Density Residential (CD:LDR): one-half acre minimum lot size. This land use designation allows for a density of 2 dwelling units per acre and is also inconsistent with the City's General Plan 2025 HR land use designation.

While the proposed change of zone and subdivision may be consistent with the County's General Plan, the proposed change of zone to allow for smaller lots serves to perpetuate an inconsistency between City and County general plans in direct conflict with the City's General Plan land use designation for the site.

With regard to General Plan consistency, adoption of the proposed subdivision and change of zone can individually or cumulatively create impacts that are not mitigated or anticipated by the City's current adopted long range planning documents. CEQA analysis for the project needs to appropriately consider and evaluate land use impacts related to consistency with both the County and City General Plans.

In an effort to achieve consistency between the County and City General Plans, and to jointly plan development in unincorporated areas adjacent to cities, City staff requests that concurrent with review of the County application associated with the proposed subdivision, the applicant file a General Plan Amendment with the City to change the City land use designation for the proposal. Please note that the filing of a General Plan Amendment application with the City does not guarantee or otherwise secure the City's approval of a General Plan Amendment. Please refer to County Action 4.3 of the attached Cities/County Memorandum of Understanding which provides that the "County desires to jointly plan with Cities for development of unincorporated areas adjacent to Cities. To facilitate this cooperative effort, the County will not approve a new development project requiring rezoning that is inconsistent with the City's adopted General Plan if the project is within the City's sphere of influence until County staff and appropriate City staff and the project applicant have met to review the subject development proposal."

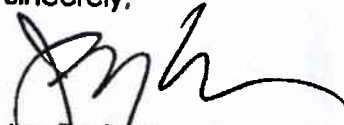

In addition to evaluating General Plan land use consistency, the CEQA analysis needs to appropriately evaluate and mitigate impacts to agricultural resources. The majority of the project site (the portion where single-family lots are proposed) is identified by both the City's General Plan 2025 Open Space and Conservation Element, and the County's General Plan as "Prime Farmland," "Farmland of Statewide Importance" and "Unique Farmland."

Public Works Department Traffic Division Comments –

The City's Traffic and Engineering Division of the Public Works Department has indicated that the proposed development falls under current thresholds requiring traffic impact analysis; however the rezoning will result in unplanned vehicular trips along the City of Riverside roadways—the impact of which has not been accounted for in any prior planning documents. In the event the County proceeds with approval of the project as proposed, it is encouraged the developer enter an agreement with the City to ensure the collection of Traffic and Railroad Signal Mitigation Fees and Transportation Impact Fees to address impacts of the project on City of Riverside roadways and intersections.

We look forward to continue working with you. Please send us copies of all revised plans, staff reports, and environmental reviews as it pertains to this project. Should you have any questions regarding this letter, please contact Oscar Romero, Planning Technician, at (951) 826-5277 or by e-mail at oromero@riversideca.gov.

Jay Eastman, AICP

CITIES/COUNTY MOU

3/12/02 12.2

3/12/2002

This Memorandum of Understanding is entered into with reference to the following facts:

Representatives of the County of Riverside (County) and the Cities of Corona, Moreno Valley and Riverside (Cities) have met on a number occasions and have in good faith exchanged proposals concerning the Riverside County Integrated Project and its effects upon the County and Cities. The County intends this MOU to be available to all cities in Riverside County.

The Riverside County Board of Supervisors (County) acknowledges the need to work cooperatively with Cities on issues of land use, mobility, economic development, open space and conservation. Riverside County has been and will continue to be one of the fastest growing regions in California. Economic forecasts project that Riverside County will approximately double its population in the next 20 years. The current system for financing local governments, cities and counties, in California does not meet the many needs. The system forces competition among local jurisdictions that often leads to questionable long-term planning decisions and discourages cooperation. To accommodate the continued high level of growth in our region, Cities and County need to develop common goals and approaches to dealing with new development.

County and Cities agree to various points that will facilitate cooperation in the planning and development of western Riverside County. Cities have conditioned their support for the Riverside County Integrated Plan to the resolution of these city/county issues. These agreed upon points may be implemented through the County's General Plan, anticipated to be adopted in the mid 2002, through implementing ordinances and policies. Prior to the adoption of the new General Plan, these policies may be implemented as a pilot program for new development projects under consideration by the County at the time of adoption of this MOU.

Representatives of County and Cities have reached an understanding as to certain policies to be adopted by County and Cities. Therefore the County and the Cities agree as follows:

City Actions:

- 1) The respective City Councils will adopt a Resolution in support of the Multiple Species Habitat Conservation Plan (MSHCP) process which includes an agreement that the cities will sign on MSHCP Section 10A Permit Application on or before March 21, 2002.
- 2) Cities will support and work in good faith with the County and the Western Riverside Council of Governments (WRCOG) to develop and implement a MSHCP for Western Riverside County.
- 3) Cities will support and work in good faith with County and the WRCOG to develop and implement a Transportation Uniform Mitigation Fee (TUMF) for Western Riverside County.

County Actions:

- 4) County agrees to implement the following policies as soon as practicable.
 - 4.1) County will adopt a policy setting forth development standards¹ and implement such standards in city spheres of influence that provides for County to have comparable development standards with cities. Prior to adoption of the New County General Plan, the County will establish agreeable development standards to apply in city spheres.
 - 4.2) County will adopt a policy and implement standards to provide that new development that occurs in unincorporated areas will "pay its own way." The requirements of this will cover the provision of community parks, recreation programs and libraries² subject to the limitations of Proposition 218.
 - 4.3) County desires to jointly plan with Cities for development in unincorporated areas adjacent to Cities. To facilitate this cooperative effort, the County will not approve a new development project requiring rezoning that is inconsistent with the City's adopted General Plan if the project is within the city's sphere of influence until county staff and appropriate city staff and the project applicant have met to review the subject development proposal. The purpose of this meeting is to develop a joint set of conditions/requirements regarding the project that will be submitted to the County Planning Commission. If County staff, City staff and the developer do not agree on the conditions/requirements, the issues will be submitted to an ad hoc committee made up of the Supervisor of the affected District and member(s) of the Council of the affected City. Following this meeting(s), County may proceed with their development review process. County and City staffs will work to establish a procedure that the Cities and the County will follow to implement this joint project review.
- 5) County will adopt a policy expressing the County's support for limiting LAFCO established Communities of Interest (COI's) to a single two year term and not extending existing COI's beyond their existing term for COI's within City Spheres of Influence nor will the County support the establishment of unincorporated communities.

The following is a partial listing of development standards as envisioned in paragraph 4.1

Street Width	Design Standards
Landscaping	Reverse Frontage Landscaping
Set Backs	Residential Lot Development, including
Parking	subdivision design grading
Undergrounding Utilities	Density
Septic Systems permitted on only one acre lots or greater	

²The phrase "pay its own way" means that the County will establish programs that will be continuing obligations of the County (utilizing a CFD, CSA or other ongoing funding mechanism subject to the requirements of Proposition 218). The use of home owner associations will be limited to services or facilities serving only that specific group of property owners.

Joint City/County Actions:

- 6) Cities will adopt a companion policy for County review of regionally significant city projects. The policy will provide for a joint review process as provided in Section 4.3 above to apply to city projects within one half (½) mile of the city limit.
- 7) County and Cities will jointly establish a procedure that both Cities and County will follow to implement this joint project review process. The procedure will define the range of projects to be subject to joint review.

This MOU shall take effect upon approval of the governing boards of Cities and County.
