Summary (continued)

building, operating and maintaining Harrison Dam. Lennar Homes is developing a residential tract referred to as Citrus Heights (Tract Map No. 36390) which encompasses 333 acres surrounding the Harrison Dam. McAllister Street is the western property limit to this subdivision. Due to the natural hilly topography, the tract development has been conditioned to include 172 acres to be preserved as open space and will develop the remaining 135 acres into approximately 345 residential units.

The development requires drainage infrastructure which includes storm drains and water quality features. The District has reviewed the improvement plans and approved the proposed facilities. One required feature of the drainage system is a detention basin for water quality purposes. Due to the proposed location of the basin in proximity to the natural watercourse, Lennar Homes has negotiated with the District to place a portion of the water quality basin within District Parcel No. 1040-201. The area herein after referred to as RCFC Parcel No. 1040-202 is approximately 16,620 square feet as described in Exhibit "A" and shown in Exhibit "B". As this facility is a water quality feature and not for flood protection, the maintenance responsibility of the basin shall be placed upon Lennar Homes, its successors and assigns. The District has determined that these subdivision improvements or the conveyance of this real property interest would not interfere with the dam function or the District's maintenance of its facility.

Therefore, the District recommends that the real property referred to as RCFC Parcel No. 1040-202 be declared surplus to the District's needs, and plans to bring the authorization action to the Board on June 21, 2016, for the sale of fee title of Parcel No. 1040-202 to Lennar Homes by Quitclaim Deed at the appraised fair market value of \$7,220.

Resolution No. F2016-17 has been approved as to form by County Counsel.
