4. Authorize the Purchasing Department to execute the consultant services agreements in accordance with applicable Board policies.

BACKGROUND:

Summary

The Riverside University Health System (RUHS) and the Sheriff's Department are working to improve the medical and mental health service care provided to inmates housed within the County's correctional facilities. The Sheriff's Department initiated a project to have EDA review and analyze current space within SCF for the development of additional medical and mental health exam rooms for inmate treatment within the facility.

Over the past several months, representatives of the Sheriff's Department, RUHS and EDA have reviewed facility medical and mental health needs for inmates, with the assistance and participation of DLR Group and Tilden-Coil Constructors, Inc. A preliminary schematic design has been developed for a new clinic that includes 7,380 square feet of new space; including four holding cells, eight mental health treatment rooms, five exam rooms, a tele-med room, nurse and deputy stations, group and work rooms, and support space.

In order to keep the project moving forward, avoid impacts and meet project schedule commitments, EDA recommends the Board of Supervisors (Board) approve the SCF Clinic project and authorize the use of existing ECDC Bond Proceeds.

EDA will return to the Board under separate cover to approve an architectural and engineering services agreement, a construction management services agreement; approve the plans and specifications, authorization to solicit and bid; approve other project related agreements; and award the construction agreement.

Impact on Citizens and Businesses

The new clinic space at SCF will improve the frequency and quality of medical and mental health treatments provided to inmates. In addition, the project will provide a cost savings to the county by reducing the need to transport inmates to outlying county care facilities to provide health care services.
