

**SUBMITTAL TO THE BOARD OF SUPERVISORS
COUNTY OF RIVERSIDE, STATE OF CALIFORNIA**

180A

FROM: Agricultural Commissioner's Office

SUBMITTAL DATE:
December 14, 2010

SUBJECT: USDA Cooperative Agreement No. 11-8500-0652-CA Providing for Glassy-Winged Sharpshooter Treatments in the Coachella Valley and Temecula Valley.

RECOMMENDED MOTION: That the Board:

- 1) Approve USDA Cooperative Agreement No. 11-8500-0652-CA in the amount of \$400,000.00; and
- 2) Authorize the chairman to sign the agreement.

BACKGROUND: Agricultural production in the Coachella Valley and Temecula Valley contributes an estimated \$1.3 billion to the local and regional economy. Among the rich and varied assortment of agricultural commodities produced in the Coachella Valley and Temecula Valley, table grapes and wine grapes alone represent approximately 15% of this economic contribution, with about 11,200 planted acres.

Unfortunately, Pierce's Disease, a bacterial disease that is fatal to grapevines, has been detected on a limited basis in Coachella Valley and Temecula Valley vineyards. The presence of Pierce's Disease, in combination with the growing incidence of an efficient insect vector called the Glassy-Winged Sharpshooter, present a serious threat to the continued viability of table grape and wine grape farming in Riverside County.

This agreement represents the ninth year of federal funding and provides \$400,000.00 to reimburse participating pest control operators and growers for costs associated with the treatment of specific, high risk citrus groves. The Agricultural Commissioner will administer the reimbursements via a temporary "pass through" account established with the assistance of the Auditor Controller's Office. This agreement was approved as to form by County Counsel.

ARTICLE 1 - PURPOSE

The purpose of this Agreement is to provide Federal financial assistance to conduct surveillance activities that will provide specific information to the Cooperator, APHIS, and other interested parties for Glassy-winged Sharpshooter.

ARTICLE 2 - AUTHORITIES

Under the Plant Protection Act, as amended, (7 USC §§ 7701 et. seq.) (PPA), the Secretary of Agriculture is authorized to issue regulations and orders to prevent, detect, control, eradicate, suppress, or retard the spread of plant pests or noxious weeds into or within the United States and to cooperate with other Federal agencies or entities, States or political subdivisions of States, national governments, local governments of other nations, domestic or international organizations, domestic or international associations, and other persons to carry out the purposes of the PPA.

ARTICLE 3 – MUTUAL UNDERSTANDINGS AND RESPONSIBILITIES

The cooperating parties agree to/that:

Upon extension of the CR or passage of an appropriation by Congress, revisions will be executed to increase the federal share, based on available funds, not to exceed the level reflected in the annual Financial Plan.

acknowledged. APHIS, furthermore, may require that the Cooperator modify or purge any acknowledgment of its support for activities conducted under this Agreement as a result of its review of a final draft. time extension of up to 12 months to complete this project. The Cooperator must submit a written request including an SF-424, Application for Federal Assistance, to extend the duration to be received by APHIS at least 10 days prior to the expiration of the funding period. The SF-424 must be accompanied by a justification explaining the reason for program delays, the program impact without the extension, and the anticipated completion date. During the extension period, financial and progress reports will continue with the same frequency as provided in the original funding period. As stated in 7 CFR 3016.30, requests for extension purely to obligate funds will be denied by APHIS. Coachella Valley Grape Growers

Temecula Valley Winegrape Growers

Coachella Valley Citrus Growers

Temecula Valley Citrus Growers

Abstract

Riverside County has two general areas where citrus groves interface with vineyards, the Coachella Valley and the Temecula Valley. The Coachella Valley with 9,600 acres of table grapes in proximity to 9,300 acres of citrus and the Temecula Valley with 2,000 acres of wine grapes in proximity to 1,000 acres of citrus are vulnerable to Pierce's disease (PD), *Xylella fastidiosa*. The grapes in the Coachella and Temecula areas of Riverside County are in jeopardy because of the glassy-winged sharpshooter (GWSS), the vector of the PD bacterium, build up in adjacent citrus groves. Citrus is an important year around reproductive host of GWSS in Riverside County, but also one that concentrates GWSS populations over the winter months during the time that grapes and many ornamental hosts are dormant. GWSS weekly monitoring in citrus in grapes began in March 2000 in Temecula Valley and 2003 in Coachella Valley by trapping and visual inspections. Temecula Valley GWSS populations in 2008 reached levels not seen prior to the initiation of the area-wide GWSS program in 2000. Coachella Valley GWSS populations have decreased dramatically since the treatment program was initiated in 2003.

Introduction

The GWSS vectors a bacterium that causes Pierce's Disease (PD). This insect and bacterium are a severe threat to California's 890,000 acres of vineyards and \$30 billion dollar industry. An area-wide GWSS management program was initiated in Temecula in 2000 to prevent this vector's spread into other California grape growing regions. In the Temecula Valley itself, the wine grape industry and its connecting tourist industry generate \$100 million of revenue for the economy of the area. GWSS/PD caused a 40% vineyard loss and almost destroyed the connecting tourist industry. The area-wide GWSS management program initiated in the spring of 2000 saved the industry from a 100% loss. Only a continuation of an area-wide GWSS management program will keep the vineyards viable in Temecula. The table grape industry in the Coachella Valley is represented by 9,600 acres of producing vines, which generate fresh market grapes valued at an average of \$110 plus million annually. The GWSS was identified in the Coachella Valley in the early 1990's. Population increases of this insect in Coachella Valley have increased the danger of PD occurrence in this area, as has occurred in similar situations in the Temecula and San Joaquin Valleys. In July 2002, the occurrence of *Xylella fastidiosa*, the PD bacterium, was found in 13 vines from 2 adjacent vineyards in the southeastern part of Coachella Valley. With this discovery, and the increasing GWSS populations, there was and is a real need to continue an area-wide GWSS/PD management program. The GWSS area-wide management program is needed to prevent an economic disaster to the work forces and connecting small businesses of Mecca, Thermal, Coachella, Indio, etc. that depend upon the vineyards for a big portion of their incomes. Only a continuation of an area-wide GWSS/PD management program will keep the vineyards viable in the Coachella Valley. At present, there are no apparent biological or climatological factors that will limit the spread of GWSS or PD. GWSS has the potential to develop high population densities in citrus. Insecticide treatments in citrus groves preceded and followed by trapping and visual inspections to determine the effectiveness of these treatments are needed to manage this devastating insect vector and bacterium.

Approximately 1,500 acres of citrus in Riverside County were treated for the GWSS in April through September, 2010 between a cooperative agreement with USDA-APHIS and the Riverside County Agricultural Commissioner's Office under the "Area-Wide Management of the Glassy-Winged Sharpshooter in the Coachella and Temecula Valleys".

Objectives

1. Delineate the areas to be targeted for follow-up treatments to suppress GWSS populations in the Temecula and Coachella Valleys for 2011.
2. Determine the impact of the 2010 GWSS area-wide treatments to suppress GWSS populations in citrus groves and adjacent vineyards.

Methods and Procedures

The programs in Coachella and Temecula are dependent upon grower, pest management consultants, citrus and vineyard manager's participation. The areas encompass approximately 23,000 acres. Representatives of various agencies are involved in the program: USDA-ARS, USDA-APHIS, CDFA, Riverside County Agricultural Commissioner, UC Riverside, UC Cooperative Extension, and grower consultants. Representatives of these agencies meet periodically to review the program. Newsletters are sent to growers, managers, wineries, and agencies with information on GWSS populations and insecticide treatments via e-mail. The information from Temecula is sent weekly, while information from Coachella goes to the various parties monthly.

Monitoring Procedures:

Monitoring for GWSS will be from October 1, 2010 through September 30, 2011.

- 1) Approximately 1,400 double-sided yellow sticky cards (7 inches x 9 inches) will be used to monitor for adult GWSS. The yellow cards will be replaced every 2 weeks during July, August, and September, and at least once a month during the other months. Numbers of males and females will be recorded. The terrain will determine the disposition of the traps. The traps will be monitored weekly.
- 2) Placement of traps – all traps will be labeled and numbered to identify the site within the management program. In citrus, yellow sticky cards will be placed at the edge of the groves at the rate of one trap/10 acres. The traps will be attached with large binder clips to wooden stakes around the perimeter of the grove; in large groves, traps will be placed in the interior as well. A GWSS trap catch can initiate a treatment in that grove. In grapes, yellow sticky cards will be placed on the edge of the vineyards adjacent to citrus groves and at intervals throughout the vineyards at a density of one trap/10 acres. Traps will be attached using large binder clips to existing vine trellises.
- 3) Visual inspections will be conducted in citrus where a GWSS adult has been found on a trap. Weekly visual searches will also be conducted in citrus and grapes that have had a previous history of GWSS catches. Adults, nymphs and egg masses will be recorded during these searches. A transect walk through a grove, doing a minimum 5 minute inspection of a minimum of 20 trees will be done. A similar inspection of vineyards will be conducted as needed, but the walk through will be determined by the trellises.

Treatments:

For a successful area-wide GWSS management program with large acreages of citrus, a management program has to be maintained. In our Riverside County GWSS area-wide program, organic citrus groves pose challenges to area-wide GWSS management programs. Organic insecticides are not as effective as the neonicotinoid insecticides, such as imidacloprid for controlling GWSS. Therefore, organic insecticides will have to be applied more frequently than its synthetic counterpart

Three monitoring scenarios can initiate a treatment in a citrus grove adjacent to a vineyard, and they are as follows: 1) a GWSS on a sticky trap in a vineyard; 2) an average of one GWSS on a sticky trap per 10 citrus trees in a grove; and/or 3) an average of one GWSS per 10 citrus trees found during a visual inspection. Insecticide treatment and follow-up treatment recommendations for the use of materials such as Admire, Alias, Assail, Danitol, Pyganic, soaps, oils, etc., in citrus groves to suppress GWSS populations will be made to the appropriate growers or their representatives. All insecticide treatment rates will be used as recommended on the label by the formulator and will be coordinated with the grower/operator of the impacted citrus grove.

Budget

Insecticide Costs including Application

TO: Phillip E. Garcia

THROUGH: [insert name of APHIS ADODR]

Dear Mr. Garcia:

Your concurrence is requested to allow pre-award costs to start on {insert date} for {insert project} activities. It is necessary to begin work prior to finalizing the Notice of Award. This will allow proposed activities to be accomplished by the projected completion date.

Costs prior to the signature of the Notice of Award will not exceed the planned obligations for the first quarter. Enclosed is the proposed financial plan supporting anticipated needs.

I agree to manage the Federally funded program in accordance with Title 7 Code of Federal Regulations Part 3016 or 3019 as applicable; the associated Office of Management and Budget (OMB) Circular governing costs allowed; and all other applicable laws, regulation, and guidelines.

I understand that APHIS is under no obligation, in the absence of appropriations, if the award is not made, or if an award is made for a lesser amount than expected. Further, I understand that reimbursements of such costs are contingent upon full execution of an award of Federal funding for this project.

Sincerely,

Preaward Request

We are all aware that sometimes the Federal Appropriations bill takes some time to get signed by the President, and unfortunately sometimes this causes delays with Federal Assistance programs.

APHIS policy is to permit work to begin 90 days prior to the signing of the Notice of Award. The letter is to request concurrence from the agency. Once approved by APHIS you may begin work on the project, however, no funds associated with that award may be requested from APHIS until an award is fully executed. The letter is simply requesting that work commences on a specific date, with the reasoning that the program would be significantly impacted if work activities were to not commence at the indicated time.

The attached is an example of a preaward letter.
