The Honorable Board of Supervisors

RE: Pavement resurfacing of Pedley Road from Jurupa Road to State Route 60 in the Glen Avon area of Riverside County.

February 2, 2011

Page 2 of 2

BACKGROUND:

By Minute Order dated December 7, 2010 (agenda item 3.34), the Board authorized the Clerk of the Board to advertise for the pavement resurfacing of Pedley Road from Jurupa Road to State Route 60 in the Glen Avon area of Riverside County. Additionally, the specifications were approved by the Board by that agenda item.

During the advertisement period, two addenda were issued to all registered plan holders as a supplement to the specifications and special provisions. Bidders are required to acknowledge and to take into account all issued addenda on their Contractor's Proposal to be considered for award. The addendum was issued to clarify and modify the approved contract documents. The addenda are attached as Addendum No. 1 and Addendum No. 2.

Bids for the project were opened in the office of the Director of Transportation at 2:00 PM, Tuesday, January 4, 2011. Seven bids were received. The basis for the selection of a contractor is the lowest responsive and responsible bid for all schedules of work. The lowest and responsible bid was submitted by All American Asphalt in the amount of \$1,019,662 which is \$208,820 (17%) below the Engineer's Estimate.

Roadway resurfacing is a preventive measure which will mitigate the current deteriorated road conditions. The road improvements will consist of cold planning of the existing pavement surface, construction of concrete curb and gutter, curb ramps, asphalt concrete dike, thermoplastic pavement markings, signing, striping and other associated work.

The existing median north of Mission Boulevard will be reinstalled with new landscaping and additional hardscape to reduce water usage, and damage to the roadway from excess irrigation. The project was extended to Jurupa Road and the pavement thickness was increased to take advantage of the low asphalt costs and extend the life of the road.

This project includes Bid Schedule 1 for roadway improvements, Bid schedule 2 for landscape median improvements and Alternate bid schedule to adjust sewer manholes to grade, which are owned by The Jurupa Community Service District. The District has approved the award of the alternate bid schedule as bid by the apparent low bidder, and the costs for the work will be funded by the District.

The contractor is qualified and has executed the contract. The contractor has also provided performance bond, payment bond and insurance documents.

WHEREAS, the parties desire to establish an escrow account with Escrow Agent (the "Escrow Account") pursuant to the provisions of Section 22300 of the California Public Contract Code.

NOW, THEREFORE, for the consideration hereinafter set forth, the Owner, Contractor, and Escrow Agent agree as follows:

1. Pursuant to Section 22300 of the Public Contract Code of the State of California, the Contractor has the option to deposit securities with Escrow Agent as a substitute for retention earnings required to be withheld by the Owner pursuant to the Construction Contract entered into between the Owner and the Contractor, for **Pedley Road Resurfacing Project/Project No. C1-0528** in the amount of **\$1,019,662.00** (hereinafter referred to as the "Contract"). Alternatively, **on written request of the Contractor, the Owner shall make payments of the retention earnings directly to the Escrow Agent.** When the Contractor deposits the securities as a substitute for Contract earnings, the Escrow Agent shall notify the Owner within ten (10) days of the deposit. The market value of the securities at the time of the substitution shall be at least equal to the cash amount then required to be withheld as retention under the terms of the Contract between the Owner and the Contractor. Securities shall be held in the name of **County of Riverside**, and shall designate the Contractor as the beneficial owner.
2. The Owner shall make progress payments to the Contractor for those funds which otherwise would be withheld from progress payments pursuant to the Contract provisions, provided that the Escrow Agent holds securities in the form and amount specified above.
3. When the Owner makes payment of the retentions earned directly to the Escrow Agent, the Escrow Agent shall hold them for the benefit of the Contractor until the time that the escrow created under this Agreement is terminated. The Contractor may direct the investment of the payments into securities. All terms and conditions of this Agreement and the rights and responsibilities of the parties shall be equally applicable and binding when the Owner pays the Escrow Agent directly.
4. The Contractor shall be responsible for paying all fees for the expenses incurred by the Escrow Agent in administering the Escrow Account and all expenses of the Owner. These expenses and payment terms shall be determined by the Owner, the Contractor and the Escrow Agent.

5. The interest earned on the securities or the money market accounts held in escrow and all interest earned on that interest shall be for the sole account of the Contractor and shall be subject to withdrawal by the Contractor at any time and from time to time without notice to the Owner.
6. The Contractor shall have the right to withdraw all or any part of the principal in the Escrow Account only by written notice to the Escrow Agent accompanied by written authorization from the Owner to the Escrow Agent that the Owner consents to the withdrawal of the amount sought to be withdrawn by the Contractor.
7. The Owner shall have a right to draw upon the securities in the event of default by the Contractor. Upon seven days' written notice to the Escrow Agent from the Owner of the default, the Escrow Agent shall immediately convert the securities to cash and shall distribute the cash as instructed by the Owner.
8. Upon receipt of written notification from the Owner certifying that the Contract is final and complete, and that the Contractor has complied with all requirements and procedures applicable to the Contract, the Escrow Agent shall release to the Contractor all securities and interest on deposit less escrow fees and charges of the Escrow Account. The escrow shall be closed immediately upon disbursement of all moneys and securities on deposit and payments of fees and charges.
9. The Escrow Agent shall rely on the written notifications from the Owner and the Contractor pursuant to Sections 5 to 8, inclusive, of this Agreement and the Owner and the Contractor shall hold the Escrow Agent harmless from the Escrow Agent's release and disbursement of the securities and interest as set forth above.

The limits of insurance of the Underlying Insurance shown in Item 4 of the Declarations shall be maintained in full effect during the period of this policy except for any reduction or exhaustion of aggregate limits contained therein solely by the payment for damages for accidents or occurrences, whichever is applicable, that take place during each annual period of this policy and that are insured by this policy.

If you fail to comply with this requirement, we will only be liable to the same extent that we would had you fully complied with this requirement.

II. Definitions

REQUIREMENTS FOR ASPHALT MODIFIER

Property	ASTM Test Method	Value
Flash Point, C.L.O.C., ⁰ C (⁰ F)	D92	207 (405) min
Viscosity, cSt @ 100 ⁰ C (212 ⁰ F)	D445	X±3*
Molecular Analysis Asphaltenes, percent by mass	D2007	0.1 max
Aromatics, percent by mass	D2007	55 min

*The symbol "X" is the viscosity of the asphalt modifier the Contractor proposes to furnish. The value "X" which the Contractor proposes shall be between the limits of 19 and 36 and shall be submitted in writing to the Engineer. Any proposed change requested by the Contractor in the value "X" shall require a new asphalt-rubber binder design.

The amount of asphalt-rubber binder to be added to the aggregate shall be between 6.7% and 8.7% by dry weight of the aggregate. The exact amount will be determined by the Engineer. The temperature of the aggregate at the time the

asphalt-rubber binder is added shall be not more than 3500 F.

The rubber shall be sufficiently dry so as to be free flowing and not produce foaming when blended with the hot asphalt.

A sample of the asphalt-rubber binder proposed for use on the project, consisting of four one-quart cans, together with the proposed formulation of the binder shall be furnished to the Engineer at least two weeks before ARHM-GG pavement construction is scheduled to begin.

The method and equipment for combining the rubber and the asphalt shall be so designed and accessible that the Engineer can readily determine the percentage by weight for each material being incorporative into the mixture.

Equipment utilized in the production and proportioning of the asphalt-rubber binder shall include the following:

An asphalt heating tank with hot oil heat transfer to heat the asphalt to the necessary temperature before blending with the granulated rubber. This unit shall be equipped with a thermostatic heat control device.
