"A Month of Rage"

February will be another one for the history books. The story of rage and unrest started in Tunisia and Morocco in January but didn't get much attention from the media. When it hit Egypt, a major U.S. ally, the story gained some traction. On February 1st, Egyptian President Hosni Mubarak told his nation he will not run for office. After days of unrest and thousands of protestors filling the streets of Cairo, he finally resigned, bringing an end to his 30-year reign.

The story is also playing out in a number of other Middle East-ern and North African oil producing countries like Yemen, Oman, Bahrain, and most notably, Libya. The citizens of Iran wanted freedom after their revolution in 1979 and now many would agree that it's not what they hoped for. One might ask, isn't this a good thing that all of these people want more freedom? Yes, freedom is a right; what's got the commodities markets spooked out are the uncertainties of who then gains power and does the spigot of oil flowing get disrupted.

Experts suggest that a 10% increase in oil prices shaves about 0.2 percentage points off of GDP. Rising oil prices certainly played a role in the Great Recession with West Texas Intermediate surpassing \$147 per barrel in July of 2008. Higher fuel costs will force consumers to pay more at the pump with rising prices eroding growth in

disposable income, all of which will cause some consumers to trim back expenditures on goods and services. Moreover higher fuel costs also contribute to higher commodity prices which are already at all record highs. These prices are evident to all of us on every trip we make to the grocery store. Fed Chairman Bernanke recently said "On the inflation front, we have recently seen significant increases in some highly visible prices, notably for gasoline." The fact of the matter is, it's a domino effect, whether it's oil, gasoline or diesel, the impacts are felt far and wide. We are concerned; will rising oil prices due to geopolitical concerns cause a spike in inflation and a subsequent double-dip recession? The question then becomes, how high and for how long? We will continue to monitor these, and other economic events closely as the TPIF is well positioned to cover any contingency, positive or negative.
