PROJECT BUDGET

CTE recognizes in this time of ever shrinking budgets, many government agencies like the EDA are looking for ways to save money on projects and to justify how and where tax dollars are spent. One way CTE has developed to save our clients money is to not use the industry billing standard of the 4, and 8 hour blocks of time, but to instead bill our clients for time on site rounding up to the nearest hour, plus one hour. While this may only save the Agency an hour here or there the savings does add up over time, thus making the most efficient use of tax dollars.

We request that while considering our proposal; please keep in mind that **our rates include review and distribution of all reports. No additional charges for travel, mileage or administrative work will be added. We don't nickel and dime our clients with miscellaneous charges for things like "Nuclear Gauge rental"** CTE is small enough to be flexible to your needs yet large enough to provide quality services in a timely and efficient manner.

PROJECT BUDGET SAVINGS

CTE employs several multi-carded Soil Technicians who could also provide concrete inspection as needed. Through efficient use of staff assigned to the project and our ability to utilize multi-registered technicians who could perform several functions during a single site visit; the EDA would be able to realize substantial savings for the project

The above estimate is based upon time on site rounded up to the next hour using a five day work week; all overtime will be billed at 1.5 times regular rate.

Please note that all inspector and technician rates will increase every July 1, commensurate with the State of California Prevailing Wage Rate annual increase.

Same day cancellations or show up time be situations will be subject to the two-hour minimum charge.

This proposal is a good faith estimate of project inspection and testing costs. Actual billing will depend on the actual construction schedule and re-testing requirements.
