The Honorable Board of Supervisors

RE: Construction of Brown Street drainage and street improvements from Souder Street to Cajalco Road, Mead Valley area.

August 16, 2012

Page 2 of 2

BACKGROUND: By Minute Order dated June 5, 2012 (Agenda Item 3.63) the Board authorized the Clerk of the Board to advertise for the construction of Brown Street drainage and street improvements from Souder Street to Cajalco Road, in the Mead Valley area.

During the advertisement period, two addenda were issued to all registered plan holders as a supplement to the specifications and special provisions. Bidders are required to acknowledge and take into account all issued addenda on their Contractor's Proposal in order to be considered for award. The addenda were issued to clarify and modify the approved contract documents. The addenda are attached as Addendum No. 1 and Addendum No. 2.

Bids for the project were opened in the office of the Director of Transportation and Land Management at 2:00 PM, Tuesday, July 3, 2012. Nine bids were received, ranging from \$177,466 to \$261,105. The lowest responsive and responsible bid was submitted by Panorama General Engineering, Inc. of Rancho Cucamonga, CA in the amount of \$177,466, which is \$59,614 (25.2%) below the Engineer's Estimate. The project is expected to be finished within the existing budget as shown on Attachment 'A'.

Project funding is being provided through an agreement between the County and the Redevelopment Agency approved on June 28, 2011 under Agenda Items 3.119 and 4.18.

The low water crossing is located approximately 250 feet south of the intersection of Cajalco Road and Brown Street where Cajalco Creek flows from east to west over the existing asphalt surface. This project will replace the existing Brown Street low water crossing by raising the profile of Brown Street to accommodate the installation of multiple barrel corrugated metal pipe culverts.

The proposed drainage improvements will improve safety by conveying flows under Brown Street and reducing the need for road closures during rain events.

The Contractor is qualified to perform the work as outlined in the bid.

The Contractor has executed the contract and has provided performance and payment bonds, which meet the requirements of the contract.
