and signalization of the on and off ramps, adding auxiliary lanes on Interstate 215, landscaping and architectural features. The project will improve traffic capacity and operation of the interchange and provide for future traffic growth that is anticipated with development of the Meridian Business Park and re-use of the March Air Reserve Base.

The project is currently under construction and is in close proximity to the March Air Reserve Base, the Veterans National Cemetery, and the March Field Air Museum. As requested by the March JPA, the project includes decorative features to commemorate the military nature of the area. Architectural lighting is one of the features. This agreement assigns March JPA responsibility for the maintenance and energy costs of the decorative lighting features within Caltrans right-of-way.

In addition, this agreement delegates the energy cost responsibility for future roadway lighting along Van Buren Boulevard to March JPA. These lights will be installed with the widening of Van Buren Boulevard between Opportunity Way and Barton Street associated with the Meridian Business Park development.
