Conference Information	RECon is the global convention for the shopping center industry and provides networking, deal making and educational opportunities for retail real estate professionals from around the world. With over 30,000 attendees and 1,000 exhibitors it is the largest industry convention, making it an unparalleled opportunity to do a year's worth of business in just three days.
Accomplishments	Riverside County played a key role in leading efforts to promote the county and its cities as a key location for retail opportunities in Inland Southern California. The retail landscape is highly competitive and having a large presence at the convention increases available opportunities. The County provided an excellent presence on the trade show floor that served as a hub for Riverside County cities, maximized exposure to foot traffic, and facilitated interaction between all partners and customers. Common meeting areas in the pavilion provided both formal and informal meeting space for participants to utilize. Critical meetings occurred in the booth in furtherance of economic development efforts with large food retailers, large discount retailers, and furniture companies. Several other meetings also took place with large office and retail developers and manufacturers who have roles in various types of development. Many unplanned meetings also occurred with customers who came to the pavilion seeking out the participants. Additionally, partners were able to distribute collateral materials about their respective regions. The collaboration with the partners yielded significant benefit at a fraction of the cost that would be required on an individual basis.
Results by the Numbers	Over 200 leads were generated for EDA and partners as a result of exhibiting at the show. In addition, over 70 formal meetings were held at the pavilion.
Conference Attendance	Approximately 32,000 attendees and 1,000 exhibitors
